**DOING BUSINESS
IN KAZAKHSTAN:
LEGAL BASICS**

Dear Friends,

We are presenting for your attention a review "Doing Business in Kazakhstan: Legal Basics" (the "**Review**") containing key information on the legal regulation and specifics of doing business in the country.

When preparing the materials, we have been taking into account the interests and needs of our clients in connection with various aspects of their activities in Kazakhstan. We hope that this Review, highlighting principal statutory regulations as of 10 January 2020, will prove helpful to guide you through the Kazakhstan's legal field.

The Review cannot be taken as legal advice or legal basis for specific Kazakhstan law related decision-making purposes. Should you require legal assistance, AEQUITAS would always be happy to see to your needs.

AEQUITAS Team

IN THIS REVIEW:

1. Kazakhstan 2022	6
2. Legal system and specifics of business regulation in Kazakhstan	11
3. Legal entities	13
4. Antitrust regulation and natural monopolies.....	19
5. Special economic and industrial zones.....	23
6. Investment	25
7. Subsoil	28
8. Land regulation	34
9. Currency regulation.....	36
10. Securities market	40
11. Permits and notifications	42
12. Taxation	44
13. Customs regulation	53
14. Public-private partnership (PPP)	56
15. Labor relations and foreign labor engagement	60
16. Procedure for foreign citizens' entry and stay in Kazakhstan.....	65
17. Personal data and protection thereof.....	68
18. Intellectual property	70

Planning to open business in Kazakhstan? AEQUITAS will be happy to help	80
AEQUITAS – a leader on the Kazakhstan's legal services market ...	81

Review shall not be treated as a legal advice or a reason for making specific decisions on the Kazakh law issues.
Should you need a legal advice, we would be happy to assist.

LIST OF ABBREVIATIONS

Abbreviation	Meaning
AIFC	Astana International Financial Centre
ARDFM	Agency for Regulation and Development of Financial Market
CIS	Commonwealth of Independent States
CIT	Corporate income tax
CSD	Central Securities Depository
EAEU, Eurasian Economic Union	Eurasian Economic Union of the Republic of Armenia, Republic of Belarus, Republic of Kyrgyzstan, Republic of Kazakhstan and Russian Federation. EAEU information portal .
EEC	Eurasian Economic Commission
FL	Foreign labor
GDP	Gross domestic product
IE	Individual entrepreneur
IIC	Individual income tax
IZ	Industrial zone
JSC	Joint stock company
LLP, partnership	Limited liability partnership
MCI	Monthly calculation index. In 2022, 1 MCI is KZT 3,063
MS	As of 1 January 2022, the minimum salary is KZT 60,000
MSMI	Mandatory social medical insurance
NBK	National Bank of Kazakhstan

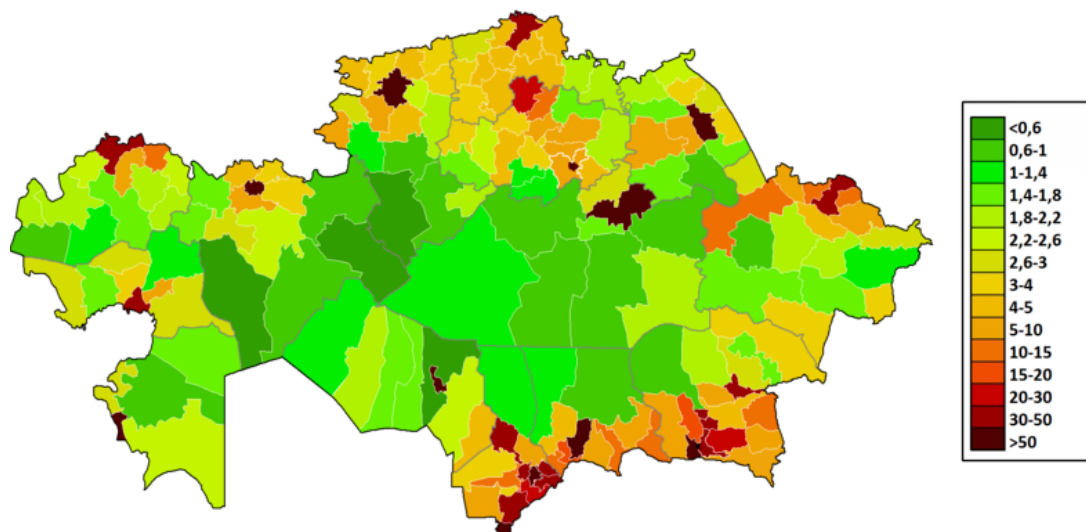

Abbreviation	Meaning
NCE	National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken"
OECD	Organization for Economic Cooperation and Development
PPP	Public-private partnership
RK, Kazakhstan	Republic of Kazakhstan
SEZ	Special economic zone
SM	Securities market
UASEC	Unified accounting system of employment contracts
VAT	Value added tax
Work Permit	Foreign labor engagement permit
WTO	World Trade Organization

1. KAZAKHSTAN 2022

1.1. GENERAL INFORMATION ON KAZAKHSTAN

According to the latest World Bank's [Doing Business](#) Report 2020, Kazakhstan was ranked 25th out of 190 countries. The World Economic Forum ranks Kazakhstan 59th out of 141 countries in terms of the [Global Competitiveness Index](#). The [WJP Rule of Law Index](#) measures Kazakhstan's rule of law performance at 66th place among 128 countries. In the [Legatum Prosperity Index](#) rankings for 2021, Kazakhstan is ranked 62nd out of 167 countries. According to the [Corruption Perceptions Index](#) (CPI 2020) rankings, Kazakhstan is 94th out of 198 countries, and 94th among 163 countries based on the [Global Peace Index](#).

- **Area.** 2,724,900 sq. km; ninth-largest country in the world by territory, the size of Western Europe.
- **Borders.** 7,591 km of Kazakhstan's borders are with the Russian Federation in the north and west, 1,783 km with China in the east, 1,242 km with Kyrgyzstan, 2,351 km with Uzbekistan and 426 km with Turkmenistan in the south, the total land border length is 13,200 km. Kazakhstan is the world's largest landlocked country, its territory being washed by the enclosed inland Caspian and Aral Seas.
- **Administrative subdivisions.** 14 oblasts and 3 cities of national significance (Almaty, Nur-Sultan and Shymkent). Major cities: Nur-Sultan (*previously Astana*, capital since 1998, population: 1.1 mln), Almaty (former capital, population: 1.9 mln), Shymkent (population: 1 mln), Karaganda, Atyrau and Aktau. Among 8 regions covered by the Doing Business Report 2020, Almaty, Aktobe and Kostanay were the best cities for doing business in Kazakhstan.
- **Climate.** Continental and extreme continental, cold winters and hot summers.
- **Population and ethnic composition.** As of 15 January 2022, Kazakhstan's [population](#) is 19,139,740 people. Kazakhstan is the 64th among the countries with the largest [population](#) and 183rd place among the countries with the largest population [density](#):

- **Religion.** Kazakhstan is a secular multi-religious country. According to Gallup research, the level of religious commitment in Kazakhstan (43%) is the lowest in the Central Asian region. Muslims account for 70% of the population and Christians – for 24%.
- **Languages.** The main languages are Russian and Kazakh. Kazakh has the status of the state language; Russian has equal official status for all levels of administrative and institutional purposes. Business is routinely using the Russian language.

In 2012, a decision was made on phased transition of the Kazakh language from the Cyrillic alphabet to the Latin script. The transition to the Latin script is to be accomplished until 2025.

- **Currency unit.** Tenge (KZT); introduced on 15 November 1993.
- **Membership.** United Nations ([UN](#)), [WTO](#), CIS, the Shanghai Cooperation Organization ([SCO](#)), [EAEU](#), [CSTO](#), [OSCE](#), [OIC](#), and [TURKSOY](#).
- **Political system.** Republic. The head of state is the President elected for a 5-year term by universal suffrage. The state power is divided into the executive, legislative and judicial branches. The principal legislative power body is the [Parliament](#) constituted by the upper (Senate) and lower (Mazhilis) chambers.
- **Industry.** Oil and gas production, iron and steel industry and electrical energy generation cover more than 60% of Kazakhstan's industrial structure. Presence of extensive natural resources made it possible to develop national primary production and processing industry with considerable prevalence of extractive sector. Kazakhstan's subsoil is prospected to contain 99 out of 105 elements of the periodic system; the reserves of 70 elements are explored and more than 60 elements are used in production. The country's mineral raw reserves encompass more than 5,000 deposits whose forecast value is estimated at tens of trillions USD. Kazakhstan is ranked the world's first for its prospected reserves of zinc, wolfram and barite, second for silver, lead and chromites, third for copper and fluorite, fourth for molybdenum, and sixth for gold, and is ranked the world's ninth for its proven reserves of oil, eighth for coal, and second for uranium.

Kazakhstan's oil industry is one of the major economy branches of Kazakhstan. The proven reserves of oil and gas condensate reach 39.8 billion barrels (approximately 5.3 billion tons). At the current rate of production and unchangeable oil and gas reserves, their production may last within 70 years. The first Kazakhstan oil was produced in November 1899 at Karashungul field in Atyrau Oblast. Kazakhstan produced 25.8 mln tons of oil in 1992 and 85.2 mln tons of oil in 2020. Major oil companies are [Tengizchevroil](#), [Karachaganak Petroleum Operating](#), [KazMunaiGas](#), [Mangistaumunaigaz](#), [CNPC-Aktobemunaigas](#) and others. Major Kazakhstan's oilfields are Tengiz, Kashagan, Karachaganak and Uzen.

- **Agriculture.** Kazakhstan is among the world's top ten exporters of grain and one of the leaders in flour export. The main crops are wheat, barley, millet, rice, cotton and tobacco. Kazakhstan is also famous for its gardens, vineyards and melon crops. The

key livestock production areas are cattle, horse, camel and sheep farming. The country also has developed poultry farming and fisheries.

- **Transport.** Kazakhstan's transportation and communications complex includes railways, airways, river transport, pipelines, motorways and telecommunications systems. Cargos are mostly transported by railway. Maritime navigation in the Caspian Sea has direct access to Iran and Azerbaijan through the ports of Aktau and Bautino.

Over the recent years, Kazakhstan has been implementing a major project "New Silk Road" intended to renew the historical role of the country as a key link of the continent and transform it into a regional business and transit hub. Today there is a network of effective transit transcontinental corridors and routes from China to Central Asia and Persian Gulf countries, diversification of which plays an important role in the development of the transport and logistic system of the country. To date, the Kazakh and Chinese sections of the Western Europe – Western China international motor road corridor (8,445 km of which 2,787 km in the Kazakhstan territory) have already been constructed and successfully function, which allowed for 2.5 times increase in freight traffic across Kazakhstan. Concurrently developed are the Trans-Caspian International Transport Route (TITR) and other projects, which will ensure "pass through" logistics in the nearest time. According to the state infrastructural development program "Nurly zhol" for 2020-2025, Kazakhstan continues removing infrastructural barriers.

In 2021, the Kazakhstan's pipelines extend to approximately 30,000 km, of which gas pipelines are 15,255.5 km long and oil pipelines are 8,015.1 km long. Caspian Pipeline Consortium (CPC) is a major international crude oil transportation project with the participation of Kazakhstan, Russia and leading international oil and gas companies, created for construction and operation of a trunk pipeline 1,500 km long. In 2018, the CPC pipeline transported 61 mln tons of crude oil. The country's overall technical capability to export oil is about 100 mln tons.

- **Tourism.** Major resorts: Burabay, Saryagash, Kapchagay, Zerenda, Muyaldy, Karkaralinsk, Bayanaul, Alakol; ski resorts: Shimbulak, Tabagan, Yelekty, Akbulak. The Valley of Castles is one of the most interesting parts of the Charyn Canyon. Fishing and mountain hiking are also well-developed in Kazakhstan.

1.2. SOCIAL AND ECONOMIC DEVELOPMENT SUMMARY

The [Kazakhstan 2050 Strategy](#), the purpose of which is to position Kazakhstan among the top 30 global economies, has been implemented since 2012. In 2015, Kazakhstan launched the Plan of the Nation "100 Concrete Steps to Implement Five Institutional Reforms." For instance, one of the tasks in the sphere of issuing construction permits is to introduce a three-stage process: to issue an architectural planning assignment within 30 days; to approve the design documents within 20 days; and to issue a construction permit within 10 days. The year 2017 marked the launch of the Third Modernization of Kazakhstan, successful implementation of the Industrialization Program, adoption of a complex program "[Digital Kazakhstan](#)" and development of a comprehensive Strategic Development Plan of Kazakhstan until 2025. Kazakhstan undergoes global country modernization involving construction of new schools, vocational colleges and universities, opening of ultramodern medical clinics and hospitals, improvement of the system for the social support of population.

In 2019, [Kassym-Jomart Tokayev](#) took office as the President of Kazakhstan, succeeding Nursultan Nazarbayev who resigned on 19 March 2019 after 29 years in office. Immediately after the inauguration, Tokayev proposed renaming the capital city of Kazakhstan after his predecessor, and the same day the Parliament of Kazakhstan approved the **renaming of Astana to Nur-Sultan**.

■ **National economy.** At the end of 2021, gross domestic product (GDP) growth reached 3.5%, and industrial production growth – 3.3%. The level of **unemployment** fell to 4.9% (451,000 people). As of 1 December 2021, the number of registered **legal entities** reached 486,021. The key measures taken in 2020 to support small and micro business entities comprised profits tax exemption for the period of 3 years (from January 2020 until January 2023) and the three-year moratorium on inspections of small and medium business entities.

1 October 2019 marked the approval of the [Concept](#) of Formation of the Common Financial Market of the Eurasian Economic Union (the "Concept"). The Concept defines the key purposes, objectives and directions of formation of the common financial market specifying the stages and measures on the implementation thereof, legal bases of its functioning, information interaction procedure and administrative cooperation of the financial market regulators, and objectives and powers of the supranational authority for regulation of the EAEU common financial market.

[National Bank of Kazakhstan](#) was reorganized on 1 January 2020. A new structure, [Agency for Regulation and Development of Financial Market](#), separated from NBK and became independent. The NBK's head office is now located in Nur-Sultan and has its representative office in Almaty. ARDFM is still located in Almaty.

Starting 16 December 2020, foreign banks will be allowed to open direct branches in Kazakhstan as part of the Kazakhstan's joining the WTO.

As part of digitalization of the labor sphere Kazakhstan implements the project "Unified Accounting System of Employment Contracts". UASEC is a new standard of relations

among the state, employers and employees, and allows to protect labor rights of employees, simplify the employment process, and mitigate the risk of document forgery. In 2020, Kazakhstan amended its [Labor Code](#) and it became mandatory to introduce information about employment contracts into the system.

Mandatory social medical insurance (MSMI) also got started in the beginning of 2020.

• • •

2. LEGAL SYSTEM AND SPECIFICS OF BUSINESS REGULATION IN KAZAKHSTAN

2.1. GENERAL INFORMATION ON KAZAKHSTAN'S LEGAL SYSTEM

Kazakhstan's legal system classifies as a Romano-Germanic (continental) system of law. The basic law having the highest legal force is the [Constitution](#) adopted in 1995 at a national referendum. The law currently in effect in Kazakhstan is the regulations of the Constitution, the Constitution-compliant laws and other legal acts, international treaties and other obligations of the Republic of Kazakhstan (RK), and the regulatory resolutions of the Constitutional Council and the Supreme Court. The international treaties ratified by Kazakhstan prevail over the national legislation and apply directly, unless the international treaty requires a special act to be issued in order for the treaty to apply.

Practically all forms and stages of doing business in Kazakhstan are legally regulated. A large number of subordinate acts (instructions, orders, etc.), which are mandatory and binding, are in effect alongside with the principal statutory acts (laws, Government decrees, etc.).

The local legislation lacks stability: acts of all levels (legislative and subordinate) are being revised and amended on a regular basis. The major factors triggering the substantial revision and amendment of the Kazakh legislation are currently Kazakhstan's accession to the WTO, the country's plans to join the OECD, further implementation of the strategy "Kazakhstan 2050," Plan of the Nation "100 Concrete Steps" to implement five institutional reforms, program of modernizing Kazakhstan's national identity "Rukhani Zhangyru," "Digital Kazakhstan" program dated 12 December 2017, strategic plan of developing the Republic of Kazakhstan until the year 2025, and the need to attract investments into economy, as those have dwindled due to the investment legal regime deterioration over the past fifteen years.

On 11 January 2022, the President Tokayev presented the new composition of the Kazakhstan Government at the extraordinary meeting of the Kazakhstan Parliament in connection with declaring the state of emergency in the country and resignation of the Government as a result of large-scale protests and subsequent events. The President concurrently gave certain instructions to the Government intended to change the social and economic policy of the state. The President also mentioned that specific steps on the country's political and economic transformation will be announced in September 2022. In view of the above, the Government is currently reviewing the current legislation and we expect subsequent legislation amendments intended to introduce the announced changes.

Kazakhstan's law application and enforcement practice cannot boast uniformity. Same-level courts can issue different, sometimes contrary, judgments in similar disputes. This may to a certain extent be explained by the fact that, formally, judicial precedent is not the source

of law in Kazakhstan. In practice, the provisions of regulatory legal acts often find different, sometimes mutually contradicting interpretation by different governmental agencies.

Currently, Kazakh legislation is going through the stage of harmonization with the unified supra-national legislation of the Eurasian Economic Union. The past several years witnessed the adoption of a large number of international treaties establishing the unified principles of governmental agencies' work and commercial activities regulation in the Union's territory.

2.2. ENTREPRENEURIAL CODE OF THE REPUBLIC OF KAZAKHSTAN

On 1 January 2016 Kazakhstan promulgated its [Entrepreneurial Code](#) No. 375-V to incorporate the regulations from several laws governing certain issues of entrepreneurship, mostly in the field of relationships between business and the state. Industry-specific types of entrepreneurship are to be regulated by special laws, as before.

The Code is generally intended to improve and develop the legislation regulating interaction between business entities and the state, support business, and eliminate gaps and contradictions in the legal regulation of *entrepreneurial* relations.

The Code introduces some new regulations, principles and concepts in the field of entrepreneurship, in particular, the principles of social responsibility of entrepreneurs, limited participation of the state in entrepreneurial activities, self-regulation in the field of entrepreneurship, and mutual responsibility of business entities and the state. The Code also introduces a new category of micro-enterprises and establishes a regime for self-regulating entrepreneur organizations and for consultative-and-advisory bodies with participation of the state and business representatives.

In addition to the traditional means of protection including judicial protection, arbitration and mediation, the Code also mentions participatory procedures and introduces the person of Kazakhstan Business Rights Commissioner.

Participatory procedures are carried out without judge's involvement, through negotiations between the parties with assistance of both parties' lawyers in order to settle the dispute.

The Kazakhstan Business Rights Commissioner is a person appointed to this position by the Presidential decree in order to represent, ensure and protect the rights and legitimate interests of business entities.

• • •

3. LEGAL ENTITIES

3.1. GENERAL PROVISIONS ON LEGAL ENTITIES

- **Types of legal entities.** In Kazakhstan, commercial legal entities (legal entity or company) may be organized using different forms of incorporation, of which the most extensively used are limited liability partnerships (LLPs) and joint stock companies (JSCs). Furthermore, a new legal entity may be set up and registered in the AIFC territory in one of the following forms of incorporation: private company, public company, investment company, restricted scope company, special purpose company, limited partnership, general partnership, limited liability partnership, foundation, and non-profit incorporated organization¹.
- **Legislative regulation.** The key legislative acts governing the activities of the said types of legal entities are the RK Civil Code (its [General Part](#) adopted in 1994 and [Special Part](#) adopted in 1999), RK [Law](#) No. 220-I "On Partnerships with Limited and Additional Liability" dated 22 April 1998, RK [Law](#) No. 2255 "On Economic Partnerships" dated 2 May 1995 and RK [Law](#) No. 415-II "On Joint Stock Companies" dated 13 May 2003, all of these in effect as many times amended.
- **State registration of legal entities.** In order to acquire the status of a legal entity, the latter must be registered with the State Corporation "Government for Citizens". The statutory period for registration is one business day (with certain exceptions). In fact, the registration takes a longer period. The registration is made based on application attaching the required documents (set of corporate documents, extracts from the companies register, etc.).
- **Online registration** is currently available in Kazakhstan for small business entities, using the entity founder's electronic signature².
- **Re-registration and liquidation (winding-up) of legal entities.** The legislation establishes statutory grounds for mandatory re-registration and liquidation (winding-up) of legal entities, which include, in particular, a change of legal entity's name, change of LLP participants, etc. Any legal entity may be liquidated either by court judgment, or on a voluntary basis. In certain fields of activities (banking, insurance, etc.), liquidation is carried out subject to certain peculiarities.
- **Corporate documents.** The main corporate documents of Kazakh companies are the **charter** and **foundation agreement** (if the number of participants or founders is more than one). The foundation agreement is a document constituting commercial secret. At JSCs, the foundation agreement terminates from the moment of the first issue of shares.

¹ For more information on legal entities and their key differences, please see a separate review dedicated to the aspects of law and activities of the AIFC.

² Please see information on AEQUITAS projects involving establishment of foreign company businesses in Kazakhstan on page 69.

At LLPs in which the register of participants is maintained by the Central Depository, the foundation agreement terminates from the date the register has been formed.

- **Liability of participants.** As a general rule, the LLP participants' (JSC shareholders') liability is limited by the amount of their contribution (value of shares held). The legislation may provide for the cases where a participant (shareholder) may be held vicariously or jointly and severally liable for the legal entity's debts.
- **Restrictions on foreign participation.** Kazakh companies engaging in certain types of activities, such as telecommunications, security, mass media, airline companies, etc., are subject to certain restrictions on foreign participation (individuals and legal entities).

Legal entities registered in offshore zones cannot directly or indirectly own, use and dispose of the voting shares in banks, insurance (reinsurance) organizations, investment fund or organizations engaging in the licensed types of activities on the securities market.

3.2. GENERAL PROVISIONS ON LLPS

LLPs are the most commonly encountered form of legal entities incorporation in Kazakhstan.

LLP participants may be both individuals and legal entities. The maximum number of participants is not limited. An LLP may as well have one participant, however, such participant cannot be another economic partnership (having the relevant status under the Kazakh legislation) organized by a sole participant.

The **minimum amount of an LLP charter capital** is 100 MCI for medium and large business entities. Starting 2015, state registration of LLPs that are small business entities no longer requires initial contributions to the charter capital.

The partnership's charter capital is divided into participation interests, which are normally in proportion to the participants' contributions. The number of votes, amount of dividends and other participants' rights depend on the size of participation interests.

Normally, the LLP management has a two-level structure, as follows:

- **supreme body** – the general meeting of participants (the sole participant); and
- **executive body** (sole or collective).

Any person, including a foreigner, may head the executive body (or be the sole executive body). LLPs may set up supervisory and audit bodies.

3.3. GENERAL PROVISIONS ON JSCS

A JSC is understood as a legal entity issuing shares in order to raise funds to carry out its activities.

A JSC may issue common shares or common (at least 75%) and preferred shares (not more than 25%). Shares are issued in a non-documentary form. Common shares are voting

shares. Preferred shares give a priority right to receive dividends in a previously determined amount and to receive a part of property in case of the JSC liquidation. Holders of preferred shares may only vote on certain issues affecting such shareholders' rights or in case payment of dividends is delayed for more than three months. All shares in a JSC may be held by one shareholder.

The **minimum amount of a JSC charter capital** must be 50,000 MCI and is to be formed via payment for shares.

The JSC management structure is three-level, as follows:

- **supreme body** – the general meeting of participants (the sole participant);
- **management body** – the board of directors; and
- **executive body** (sole or collective).

The members of a JSC's board of directors and executive body may only be individuals. The members of the board of directors and the executive body may be persons who are not the company shareholders.

3.4. DIFFERENCES IN THE LLP AND JSC LEGAL REGIME

LLPs and JSCs differ quite seriously, which must be taken into account when deciding on setting up a legal entity.

The key difference between an LLP and JSC is a tougher regulation of JSC activities, which is mostly due to the issue of shares (JSC's fundamental operating matter) being controlled by a special state regulator.

The LLP activities are less formalized, which allows some freedom when deciding, for example, on such issues as management procedure, distribution of participation interests, distribution of participants' votes, etc. Moreover, since LLPs do not issue shares, they are exempt from a number of statutory requirements pertaining to securities.

In a JSC, each common share gives its holder the same scope of rights with the other holders of common shares. Voting at general meetings of shareholders is held according to the "one share – one vote" principle.

Changes in the composition of LLP participants (except for LLPs whose register of participants is maintained by the Central Depository), for instance, as a result of a participant's selling or otherwise alienating his/her/its interest, are the ground for the LLP re-registration with the justice authorities. A sale or alienation of shares entailing changes in the composition of shareholders does not entail the JSC state re-registration.

It is also necessary to mind the following specific statutory requirements to JSC activities:

- a larger (as compared to LLPs) amount of minimum charter capital and the need to fully pay it in within 30 days of the JSC state registration;

- the need to observe a special procedure when consummating certain categories of transactions, as well as the public disclosure requirement;
- complicated shares issue registration procedure; and
- the procedure for convening and holding the general meeting of shareholders is strictly regulated by legislation.

3.5. BRANCH/REPRESENTATIVE OFFICE

According to Kazakh legislation, **branches/representative offices** are not legal entities, but are recognized as their structural subdivisions located outside the principal location of the parent company.

The difference in the branch vs. representative office legal regulation is that a branch may perform all functions of the parent company, including representative functions, while a representative office is normally set up in order to study the market and to represent and protect the parent company's interests, and does not carry out commercial activities.

The key differences between a branch/representative office and a legal entity are as follows:

- no requirement to form a charter capital;
- no need to obtain the foreign labor engagement permit (work permit) for the head of a branch/representative office of a foreign entity (this very exception also applies to chief executive officers of Kazakhstan legal entities and their deputies with 100% foreign participation in the charter capital);
- income after taxes in Kazakhstan may be repatriated without paying additional taxes and without complying with the currency control requirements.

Starting 1 July 2019, branches and representative offices of foreign companies are recognized as currency residents and must perform settlements with residents in tenge only.

- Branches/representative offices have no property of their own (all property is deemed to be the parent company's property) and act in civil relations on behalf of the parent company, the liability for their actions also lying with the parent company. Branches and representative offices are independent taxpayers with respect to certain types of taxes, and are liable as legal entities if committing administrative violations in the taxation area.

Branches/representative offices are managed by their heads appointed by the authorized body of the parent company and acting based on a power of attorney. The head of a branch/representative office may be any person, regardless of residence.

Branches/representative offices are subject to the state record registration.

When choosing between the form of business incorporation in Kazakhstan and between a branch/representative office and a legal entity, it is necessary to take into account the

statutory provisions on public procurement and provisions relating to procurement by national companies. Given the toughening of legislative requirements to local content in goods, work, services and staff, preference in procurement is typically given to local companies.

3.6. ACQUISITION OF SHARES (PARTICIPATION INTERESTS) IN KAZAKH COMPANIES

As a rule, participation interests in LLPs are acquired based on a sale and purchase agreement (it is also possible to use other types of civil transactions). Acquisition/alienation of participation interests entails change of the LLP participants, which is a ground for the LLP state re-registration (except where the register of LLP participants is being maintained by a registrar). When a new participant enters the LLP, it is necessary to execute the so-called agreement on accession to the foundation agreement, or to enter into the foundation agreement (if the partnership had a sole participant before the entry of the new one).

If the LLP participation interests are alienated in favor of a third party, the remaining participants have a pre-emptive right to purchase such participation interests.

Shares may be acquired both at their initial public offering by the JSC, and on the secondary securities market. If intending to acquire 30% or more shares, the acquirer must notify both the company itself and the financial market supervision authority. After having acquired 30% or more of voting shares, the acquirer must make an offer to the remaining shareholders to buy out their shares.

Special requirements are established with respect to the acquisition of shares in banks and insurance companies and shares and participation interests in subsoil user companies, owners of strategic facilities and other organizations engaging in certain types of activities. In particular, if alienating shares and participation interests in subsoil user companies, it is required to obtain the state's consent to such alienation, while the state has a pre-emptive right to purchase the shares or participation interests being alienated. Similar rules apply to strategic facilities, the list of which is approved by the RK Government.

Depending on the parameters of the shares or participation interests alienation/acquisition transaction, it may be required to first obtain the antitrust agency's consent.

3.7. NATIONAL CHAMBER OF ENTREPRENEURS

The [National Chamber](#) of Entrepreneurs is a non-profit self-governed organization established in order to form favorable conditions for the development of entrepreneurship based on the effective partnership of business and authorities.

The NCE's objectives are to protect the rights and interests of entrepreneurs and to ensure broad coverage and involvement of all entrepreneurs in the process of formation of legislative and other normative rules for business functioning.

The NCE members are automatically all for-profit legal entities registered in Kazakhstan (including banks and banking organizations, national companies, and organizations comprising national holding companies active in the industry, agriculture and financial sector), individual entrepreneurs, and agricultural (farming) enterprises, which must pay a membership fee based on the amount of their aggregate annual income.

Branches and representative offices of foreign organizations, entrepreneurship entities engaging in audit and valuation activities, state enterprises, and non-profit legal entities do not fall under membership in the National Chamber.

• • •

4. ANTITRUST REGULATION AND NATURAL MONOPOLIES

4.1. ECONOMIC CONCENTRATION CONTROL

The **economic concentration transactions/actions**, which are subject to prior approval by the Kazakhstan antitrust agency, include:

- reorganization by way of merger or accession;
- acquisition of voting shares (participation interests), as a result of which the acquirer or its group of entities acquires the right to dispose of more than 50% of shares (participation interests). This requirement does not apply to legal entity's founders at its establishment;
- obtainment of ownership, possession and use over fixed production assets or intangible assets, if the book value of property constituting the subject of transaction exceeds 10% of the book value of the fixed production assets and intangible assets of the market entity alienating or transferring the property;
- acquisition of rights enabling to issue instructions binding on another market entity in its conducting business activities or perform the functions of its executive body; and
- participation of one and the same individuals in the executive bodies, boards of directors, supervisory boards or other management bodies of two or more legal entities, provided that such individuals define the conditions of such market entities' business activities.

IMPORTANT!

In certain cases the above transactions/actions are not considered economic concentration, for example, if such transaction occurs within one group of entities.

It is required to obtain the consent of/notify the antitrust agency in case the aggregate book value of assets of the legal entities being reorganized (group of entities) or the acquirer (group of entities) under the transaction and the legal entity whose shares (participation interests) are being acquired, or their aggregate sales of goods for the past financial year exceeds, as of the date of application submission, 10,000,000 MCI.

Transactions involving financial organizations fall under special conditions.

The Chapter "[Economic Competition](#)" of RK Entrepreneurial Code adopted on 29 October 2015 and effective since 1 January 2016 is extraterritorial: some of its provisions also apply to actions performed outside Kazakhstan, provided that such actions:

- directly or indirectly affect fixed or intangible assets located in the RK territory, or shares (participation interests) of market entities, or property or non-property rights with respect to RK legal entities; or
- limit competition in Kazakhstan.

Economic concentration performed without the antitrust agency's consent may be invalidated by court upon a claim of the antitrust agency, if such concentration has led to the establishment or strengthening of a dominant or monopolistic position of a market entity or a group of entities, or to the limitation of competition.

[Annex 19](#) to the Treaty on the Eurasian Economic Union "Protocol on General Principles and Rules of Competition" is effective within the EAEU.

4.2. BAN ON MONOPOLISTIC ACTIVITIES

The competition protection legislation bans monopolistic activities. The types of monopolistic activities restricted by law include anti-competitive agreements and concerted actions by market entities and abuse of a dominant or monopolistic position.

- Recognized as **monopolistic** is the position of the natural monopoly entities, state monopoly entities or legal entities holding 100% share on the relevant commodity market.
- Recognized as **dominant** is the position of a legal entity whose share on the relevant commodity market constitutes 50% or more. Also, if some conditions are present, the position of an entity can be recognized as dominant if its share on the relevant commodity market constitutes 35%. Special criteria are stipulated for collective dominance.
- **Unfair competition** is prohibited. The RK Entrepreneurial Code sets out an exhaustive list of actions, which may be recognized as unfair competition, such actions include, but are not limited to the following:
 - unlawful use of other manufacturer's trademarks, packaging and products;
 - copying of product appearance;
 - knowingly false, unfair or untrustworthy advertising;
 - sale of goods, providing to the customer untrustworthy information on the nature, method and place of manufacture, consumer properties, quality and quantity of goods, or on their manufacturers, etc.; and
 - please note that starting from 7 March 2022 the definition of "unfair competition" will be brought in line with the international obligations assumed by Kazakhstan. Thus, recognized as unfair competition may be any unlawful actions aimed at acquisition of advantages in entrepreneurial activities, which may cause or have caused damages to competitors, or may inflict or have inflicted harm on their business reputation. Therefore, the list of actions, which may be recognized as unfair competition, will be significantly expanded.

4.3. NATURAL MONOPOLIES REGULATION

The **natural monopoly** in Kazakhstan encompasses certain types of services (goods, work) relating to oil and oil products; commercial and sour gas; electric and heat power; main-line railways, access ways, air navigation, port and airport services; water supply and disposal. The list of services (goods, work) subject to regulation is approved by the authorized agency, which, as of the date hereof, is the RK Ministry of National Economy.

The natural monopoly entities are subject to specific restrictions and additional obligations, for instance, the natural monopoly entities cannot:

- charge payment for providing information about available capacities;
- request for provision of permits and other documents issued by governmental agencies, non-governmental organizations, which do not relate to a service subjected to regulation;
- impose requirements on a consumer other than the requirement to comply with technical conditions for connecting to the natural monopoly entity's networks or increasing the scope of services subjected to regulation;
- create unequal access conditions to a service subjected to regulation;
- restrict the consumer's activities involving the performance of work in accordance with the technical conditions for connecting to the natural monopoly entity's networks or increasing the scope of services subjected to regulation;
- request for approval of a construction project as to compliance with technical conditions for connecting to the natural monopoly entity's networks or increasing the scope of services subjected to regulation.

Natural monopoly entities are obligated, among other things, to provide services (goods, work) subjected to regulation at the tariffs (prices, fee rates) as approved by the authorized agency, and inform consumers about the tariffs and tariff changes within the timeframes provided for by legislation.

Besides, the state regulates the prices for goods (work, services) produced on socially significant markets in the field of rail transport, electric and heat power generation, oil products manufacture, oil and gas transportation, and civil aviation, as well as prices for subsidized services in the area of postal services, telecommunications and shipments. Natural monopoly entities are obligated to comply with the pricing procedure on regulated markets and to submit to the authorized agency the information on the sale prices for goods (work, services), quarterly and monthly information on the volume of production (sales) and rate of return, etc.

The [Protocol](#) on Common Principles and Rules for Regulation of Activities of Natural Monopoly Entities applies to the EAEU member states (Annex 20 to the Treaty on the Eurasian Economic Union).

• • •

5. SPECIAL ECONOMIC AND INDUSTRIAL ZONES

Kazakhstan has several so-called **special economic zones ("SEZ") and industrial zones ("IZ")**. Understood as SEZ is a part of the RK territory with accurate boundaries and a special legal regime of SEZ for carrying out priority types of activities, the list of which is determined by an authorized governmental agency exercising state regulation of activities of SEZ. The resolution to set up a SEZ is adopted by the Kazakhstan Government.

Each SEZ has been set up in order to develop a particular sector of economy. For example, the "Ontustik" SEZ was created in Shymkent to develop textile industry; "Astana – the New City" SEZ – in order to set up highly efficient and competitive enterprises and to master the manufacture of new types of products; "Information Technologies Park" SEZ in Almaty – in order to develop the IT branch of economy; and "Khorgos – Eastern Gate" SEZ – in order to create an efficient transport-and-logistics and industrial hub, and to unlock Kazakhstan's transit potential, which will contribute to the development of economic and cultural exchange with the bordering countries.

A SEZ may be set up for a term up to twenty five years. The term of functioning of a SEZ may be extended if so decided by the RK Government.

The participants in a SEZ enjoy in its territory a special legal regime providing for the benefits stipulated by the tax, customs, land legislation, including legislation on population employment and the effective [Law](#) No. 242-VI "On Special Economic and Industrial Zones" dated 3 April 2019 ("**SEZ and IZ Law**").

For instance, pursuant to the Tax Code, when assessing the land tax, property tax and land user fee payable to the budget with respect to taxable items located in the SEZ territory, for organizations or individual entrepreneurs carrying out the priority types of activities in the SEZ territory, its amount is reduced by 100%. The said reduction is a preference on taxes and duties.

The organizations carrying out activities in the SEZ territory enjoy 100% reduction of corporate income tax assessed according to the RK Tax Code, if applied to income received from the sale of goods, work and services resulting from carrying out of the priority types of activities.

SEZ territory is a part of the customs territory of the Eurasian Economic Union with the customs procedure of a free customs zone in effect in accordance with the customs legislation of the EAEU and/or the RK. Foreign and domestic goods located and used in the SEZ territory fall under the free customs zone procedure: no customs duties and taxes (other than excise tax) are levied on imported goods, no restrictions or limitations are applied to the EAEU goods and no non-tariff regulation measures are applied, except for product safety requirements.

No customs clearance of goods moved within the customs territories of the Republic of Kazakhstan, Republic of Belarus, Kyrgyz Republic, Russian Federation and Republic of Armenia is required.

Understood as IZ is a territory equipped with engineering and communications infrastructure provided to private entrepreneurial entities for the placement and operation of objects of entrepreneurial activities, including in the sphere of industry, agro-industrial complex, tourist industry, transportation logistics and waste management. IZ are set up in the RK territory to ensure infrastructural facilities for the development of entrepreneurial activities in regions.

When providing state and other services in the IZ territory, one stop principle is applied, which allows for timely provision of state and other services, including provision of information assistance with respect to the state and other services provided.

Depending on the subject that creates IZ and the source of financing, IZ may be divided into state and private. In turn, the state IZ may be divided into IZ of national significance, IZ of regional significance and small-scale IZ.

A resolution to create a state IZ is adopted by a local executive authority. Private IZ requires mandatory approval by a local executive authority. A variety of a private industrial zone created by individuals and/or non-state legal entities is a special industrial zone, in the territory of which it is allowed to directly apply international construction norms and rules, including international regional standards and standards of foreign countries.

IZ of national and regional significance is created for at least 20 years. The term of functioning of the above IZ may be extended upon a resolution of a local executive authority.

The single coordination center for SEZ and IZ is Kazakhstan Industry and Export Center "QazIndustry" JSC. The purposes of the single coordination center are to develop, promote and improve investment opportunities of SEZ and IZ.

• • •

6. INVESTMENT

6.1. GENERAL PROVISIONS

Today, Kazakhstan holds a leading position among the CIS countries by the amount of attracted foreign investment per capita.

The current investment regime is determined by the RK [Entrepreneurial Code](#) No. 375-V dated 29 October 2015 and by a number of international conventions and treaties.

The Code provides for the state support of investment activities and for state guarantees of investor rights (contract stabilization, free use of income, transparency of state investment policy, compensation for losses in case of nationalization or requisition of investor's property, and some other), as well as the possibility to resolve investment disputes through negotiations or international arbitration.

Pursuant to the Investment Law, understood as **investment** in Kazakhstan are all types of property (except for goods intended for personal use), including subjects of financial leasing and rights thereto, contributed by the investor into the charter capital of a legal entity, or the increase of fixed assets used for entrepreneurial activities or for the implementation of public-private partnership projects, including concession projects.

Bilateral international treaties also contain the "investment" concept, sometimes broader than that contained in the Entrepreneurial Code; therefore, in each particular case of defining the investment legal regime it is necessary to take into account not only the provisions of the Code, but also the provisions of the relevant international treaties.

Domestic and foreign investors generally fall under the same investment regime, with certain exceptions.

6.2. INVESTMENT LEGAL REGIME

■ Guarantees of Investor Activities Legal Protection

Investors enjoy protection of their rights and interests ensured by the RK [Constitution](#), RK Entrepreneurial Code and other regulatory legal acts, as well as by ratified international treaties.

This guarantee provides for investor's right to the compensation of harm caused by the issuance of subordinate legislative acts incompliant with the RK legislation or by unlawful actions (omissions) of the state officials.

Kazakhstan also guarantees stability of contracts entered into between investors and Kazakh governmental agencies, with certain exceptions expressly provided for by legislation, which specifically include as follows:

- introduction of amendments into the RK legislation, or entry into force or amendment of international treaties, which change the procedure and conditions for the importation, production and sale of excisable goods; and
- introduction of amendments into legislative acts in order to ensure the national security, public order, healthcare and morals of the population.

■ Use of Income Guarantees

The legislation entitles investors to use at their discretion the proceeds from their activities after payment of taxes and other obligatory payments to the budget, and open accounts in national or foreign currency with the banks in the RK territory.

■ Guarantees of Investor Rights in Case of Nationalization or Requisition

Compulsory taking of investor's property for public needs is only allowed in exceptional cases stipulated by legislative acts. In such cases, the investor is to be compensated for the losses in full.

■ Dispute Settlement

Investment disputes may be settled through negotiations or in accordance with the dispute settlement procedure previously agreed upon by the parties. Typically, investors choose commercial arbitration as a method to settle the disputes.

Investment disputes may also be settled in accordance with international treaties and RK legislative acts in Kazakh courts or investment arbitration.

6.3. INTERNATIONAL LEGAL PROTECTION OF INVESTMENT

In order to ensure the international legal protection of investments, Kazakhstan ratified the following international conventions (treaties):

- [Convention](#) on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 10 June 1958);
- [Convention](#) on the Settlement of Investment Disputes between States and Nationals of Other States (ICSID) (Washington, DC, 18 March 1965);
- [Convention](#) Establishing the Multilateral Investment Guarantee Agency (Seoul, 11 October 1985);
- Energy Charter [Treaty](#) (Lisbon, 17 December 1994);
- [Convention](#) for the Protection of Investors' Rights (Moscow, 28 March 1997).

Besides, Kazakhstan participates in a number of multilateral treaties for the support and encouragement of investments, including bilateral investment treaties with more than 40 states.

6.4. INVESTMENT PREFERENCES

Investor **preferences** are possible in priority branches of economy, which include, in particular: manufacture of food products, apparel, paper products, electronic equipment and transport vehicles; processing industry; chemical industry; metallurgical industry; construction; transport and telecommunications infrastructure, etc.

Preferences are granted only to Kazakh legal entities implementing an investment project or special investment project, and to leasing companies (including RK nonresidents, importing, as part of an investment project implementation, process equipment under a financial leasing contract for a Kazakh legal entity implementing the investment project).

The following types of investment preferences are granted for investment projects (including priority investment projects):

- exemption from customs duties and value added tax on imports; and
- state in-kind grants.

The following types of investment preferences are granted for priority investment projects:

- **tax preferences** (up to 10 year exemption from corporate income tax; up to 10 year exemption from land tax; and up to 8 year exemption from property tax); and
- **investment subsidy** (state's compensation of up to 30% of investor's costs after facility commissioning).

Special investment projects are granted preferences in the form of exemption from import customs duties.

In order to be granted preferences, investors must enter into a contract with the authorized state agency.

6.5. ADDITIONAL STATE SUPPORT MEASURES

In the framework of concluded contracts for priority investment projects implementation, the law provides for the "stabilization" of tax rates.

Besides, investors may engage foreign labor, beyond quota, for the entire construction period of the investment project and for one year after the facility commissioning.

• • •

7. SUBSOIL

7.1. SUBSOIL USE LEGAL REGULATION

The Kazakhstan [Code](#) on Subsoil and Subsoil Use (Subsoil Code) was adopted on 27 December 2017 and entered into force on 29 June 2018, i.e. upon expiration of six-month period of the date of its official publication, which took place on 28 December 2017. The only exception is a norm governing a particular case of introducing data into the program for the state management of the subsoil fund upon the subsoil user's application (Article 278.4.3 of the Code), which entered into force on 8 January 2018. Certain regulatory norms will be put into effect in 2020, 2021, 2022 and 2024.

The Subsoil Code cancelled the previous basic law governing the subsoil use issues as applied to all minerals – Kazakhstan Law on Subsoil and Subsoil Use of 24 June 2010 (which replaced the 1996 Law on Subsoil and Subsoil Use and 1995 Oil Law).

During several years from the date of adopting the Subsoil Code, Kazakhstan has adopted new subordinate acts in furtherance of the Subsoil Code and adapted the previously adopted subordinate acts to the provisions of the Subsoil Code.

Relations in the subsoil use area are also governed by the provisions of civil, environmental, corporate, currency, land and other sectoral legislation.

The most important international treaty relating to subsoil use and ratified by Kazakhstan is the Energy Charter [Treaty](#). International regulation also covers environmental protection, legal status of the Caspian Sea and other issues. Besides, also in effect are bilateral investment treaties entered into by Kazakhstan with practically all economically developed countries and some CIS countries.

7.2. SUBSOIL USE RIGHT

The subsoil use right is granted in order to conduct the following operations:

- geological study of subsoil;
- minerals exploration;
- minerals production;
- use of subsoil space; and
- prospecting.

Subsoil use right represents an opportunity secured by the Subsoil Code to use subsoil within a definite term on a fee-paid basis in the allocated plot for business purposes.

Subsoil use right may be granted to local and foreign legal entities and individuals.

Subsoil use rights may also be granted to several persons under the same contract. Such persons are joint right holders and may hold the subsoil use right only after determining the share held by each of them.

In order to identify the territory of a subsoil block for the purpose of exploration and geological study of subsoil the Kazakhstan territory is conditionally divided into blocks, each side of which is equal to 1 minute in the Geographic Reference System.

7.3. ORIGINATION OF SUBSOIL USE RIGHT

Subsoil use right originates on the basis of a license or a subsoil use contract.

Subsoil use right may be acquired in the event of granting the subsoil use right by a public authority, transferring the subsoil use right (share therein) under civil transactions and in accordance with the legal succession procedure, if a legal entity is reorganized, except for transformation or inheritance.

To date, there are two regimes of subsoil use: license regime and contract regime.

■ **License regime.** Licenses are issued for certain types of subsoil use operations, as follows:

- geological study of subsoil;
- solid minerals exploration;
- solid minerals extraction;
- common minerals production;
- use of subsoil space; and
- prospecting.

A license for exploration of solid minerals is issued based on an application from a future subsoil user for the term of 6 consecutive years with a possibility to extend the license for another term of up to 5 years, if a relevant application is filed by a subsoil user. The subsoil use right under an exploration license cannot be transferred within the first year of its term.

If an exploration license covers 10 blocks or more, it may be extended if a subsoil user waives of a part of the exploration plot, and the territory of such part must be at least 40% of such blocks.

The term of a license for extraction of solid minerals cannot exceed 25 consecutive years and may be extended for an unlimited number of times for the term not to exceed the initial license term.

The territory of a plot (plots) for exploration of solid minerals under one license cannot exceed 200 blocks.

License for extraction of solid minerals is subject to revocation by the competent authority under one of the below grounds:

- violation of requirements to obtainment of a permit for the subsoil use right transfer entailing a threat to national security;
- failure to pay the subscription bonus and fees for the use of land plots (lease payment) in the amount and in accordance with the procedure established by the tax legislation of Kazakhstan;
- failure to perform obligations on annual minimum expenses for solid minerals exploration established by a license;
- any grounds for revocation of a license specified in the license.

In the event of violating the obligations stipulated by a license, the competent authority will send a respective notice in writing. In the event of failure to eliminate a violation within the term established by the Subsoil Code, the competent authority will revoke the license by sending a respective notice in writing.

- **Contract regime.** A subsoil use contract is concluded for the purpose of exploration and production of hydrocarbons and uranium.

Individuals and legal entities who are not national companies may be granted subsoil use right under a contract according to the auction results. Subsoil use right is granted to national companies on the basis of direct negotiations.

The maximum duration of hydrocarbons exploration cannot exceed 6 consecutive years, and if the case is about an offshore subsoil block or complicated hydrocarbons exploration projects, the exploration duration cannot exceed 9 years.

In order to evaluate the discovered deposit, including trial production, the term for exploration under the hydrocarbons exploration and production contract may be one time extended with respect to each discovered deposit (aggregate of deposits) for the term up to 3 years, and if the case is about an offshore subsoil block or complicated hydrocarbons exploration projects – up to 6 years.

Taking into account the allowed extensions, the exploration stage under the hydrocarbons exploration and production contract cannot exceed 9 years, and if the case is about an offshore subsoil block or complicated hydrocarbons exploration projects – 15 years.

The maximum duration of production cannot exceed 25 years, and at major and unique fields – 45 years.

The period of production may be extended to the term of up to 25 consecutive years.

The territory of the plot(s) for exploration under a single hydrocarbons exploration contract cannot exceed 2,400 blocks.

The competent authority may early terminate a subsoil use contract in accordance with unilateral procedure in instances as set out below:

- entry into force of a court judgment prohibiting subsoil use activities;

- conducting subsoil use operations with respect to hydrocarbons without respective expert examination of the project documents approved by a subsoil user, with respect to which the subsoil user obtained relevant positive opinions stipulated by the RK legislation;
- violation of requirements to obtainment of a permit for the subsoil use right transfer entailing a threat to national security.

The competent authority may also early terminate a subsoil use contract in accordance with unilateral procedure, provided the subsoil user fails to eliminate within the established period:

- one of violations specified in the competent authority's notice;
- more than two violations of other obligations established by a subsoil use contract.

Uranium mining. Uranium mining falls within special regulation. Right for uranium mining is granted to national companies only; however, it is not prohibited to subsequently transfer the right for uranium mining to companies that are not national companies.

The subsoil block granted to a national company on the basis of direct negotiations under a single contract for uranium mining cannot exceed in the aggregate 200 blocks.

Transfer of subsoil use right to other subsoil users. The legislation regulates not only the transfer of subsoil use right, but also of the subsoil use right-related objects, which include participation interests (shareholdings):

- in a subsoil user legal entity; and
- in a legal entity that has the possibility to directly or indirectly define such subsoil user's decisions, if the legal entity's principal activities are associated with subsoil use in Kazakhstan.

The transfer of subsoil use right is allowed only on consent of the competent authority, which is issued for each individual case of such transfer. **A transaction consummated without the competent authority's consent is deemed null and void.**

This rule has some exceptions, for instance, no consent is required to transfer the subsoil use right and/or objects related thereto to a subsidiary in which at least 99% participation interest (shareholding) belongs to the subsoil user, unless such subsidiary is registered in a tax haven. Similarly, no consent is required to transfer the subsoil use right and/or objects related thereto to a person, which directly or indirectly controls more than 99% participation interest (shareholding) in a subsoil user or the owner of the subsoil use right-related object.

The transfer of subsoil use right on the basis of universal succession is possible in case of legal entity reorganization and will require no consent, if more than 99% participation interest (shareholding) of the reorganized legal entity belong to one person.

The subsoil use right (share therein) is transferred by way of reissuing a subsoil use license or introducing amendments into the subsoil use contract accordingly.

Subsoil use right under previously concluded contracts and licenses. Provisions of the Subsoil Code apply to relations arising after its entry into force; however, certain rules apply in respect of previously concluded subsoil use contracts (and licenses, if applicable) despite the stability norms contained in such contracts. As regards the new regulations, it is worth pointing out that there is a mandatory requirement that starting July 2021 subsoil users must conclude bank deposit pledge agreements to ensure funds for the liquidation of consequences of subsoil user's activities.

Provisions of legislation previously in effect remain in force until expiration of such contracts or introduction of relevant amendments, e.g. provisions on the local content ratio, confidentiality of information, including geological information, amount and reimbursement of historical costs, penalty for failure to perform obligations on local content, etc.

7.4. STATE'S PRE-EMPTIVE RIGHT TO ACQUIRE SUBSOIL USE RIGHTS

The state has the pre-emptive right to acquire the subsoil use right (a part thereof) being alienated and/or the objects related to the subsoil use right pertaining to a strategic subsoil block, including shares and other securities being the objects related to the subsoil use right pertaining to a strategic subsoil block, which are put into circulation on the established securities market.

The list of strategic subsoil blocks is approved by the Government of the Republic of Kazakhstan. In case of transferring the subsoil use right to a strategic subsoil block, one must obtain the state's waiver of the pre-emptive right in addition to a permit to alienate the subsoil use right and/or the objects related to the subsoil use right.

7.5. IN-COUNTRY VALUE REQUIREMENTS

Kazakhstan is now largely supporting local producers, which finds reflection in the provisions of the Subsoil Code and many bylaws.

The in-country value obligations are *mandatory* conditions for subsoil use contracts and licenses represent concrete quantitative indicators. The minimum in-country value index must be at least 50%.

The following subsoil user's in-country value obligations are secured by the Subsoil Code:

- tender-based engagement of local work and service providers during subsoil use operations, if such services meet the standards, price and quality characteristics of similar services provided by nonresidents, this provision being applicable to goods if conducting activities under contracts concluded prior to 1 January 2015; and
- giving preference to local personnel during subsoil use operations, and financing their training and retraining.

The procedure for goods, work and services acquisition by subsoil users is fairly detailed by legislation and is aimed, among other things, to support local producers. For example, when summarizing tender results, the tender price offered by local producers is conditionally decreased by 20% (provided their goods, work and services meet the tender and technical regulation requirements).

7.6. ENVIRONMENTAL REQUIREMENTS IN SUBSOIL USE

The environmental basis for conducting subsoil use operations is a positive opinion of the state environmental expert review of project documentation and the environmental permit.

Subsoil user must submit for state environmental expert review all pre-project and project documentation, which must include the contemplated activities' environmental impact assessment and contain an "Environmental Protection" section.

In addition, when conducting subsoil use operations it is required to observe a number of environmental requirements established by the environmental and subsoil use legislation.

7.7. BUSINESS ENCOURAGEMENT AGREEMENT

Starting from 1 January 2022, the concept of "business encouragement agreement" from the Subsoil Code entered into effect. This concept means the agreements entered into by authorized agencies in the sphere of hydrocarbons, uranium mining and solid minerals production with National Chamber of Entrepreneurs of Kazakhstan and subsoil users on a voluntary basis and aimed at the support of local producers.

National Chamber of Entrepreneurs of Kazakhstan together with the authorized agencies in the sphere of hydrocarbons, uranium mining and solid minerals production exercise monitoring of the fulfillment of the business encouragement agreement conditions and publish the outcome thereof on the Internet resources based on the data from subsoil user companies submitted by way of granting access to the systems.

• • •

8. LAND REGULATION

8.1. STATE AND PRIVATE LAND OWNERSHIP

The key act governing land relations in Kazakhstan is the RK [Land Code](#) No. 442-II adopted on 20 June 2003.

The land in Kazakhstan is state-owned. In certain established cases, land plots may also be privately owned.

- **Kazakhstan non-state companies may privately own** land plots designated for agricultural production, forestation or construction development purposes, or with built-up production and non-production (including residential) buildings or building compounds, including land intended for the buildings maintenance in accordance with their designation.
- **Foreign citizens, stateless persons and foreign (non-state) companies may privately own** only land plots designated for construction development or with built-up production and non-production (including residential) buildings or building compounds, including land intended for the buildings maintenance.
- Kazakhstan citizens may privately own land plots designated for agricultural production or farming, private farm household, forestation, horticulture, individual housing construction and individual country houses construction, and land plots provided (to be provided) for development purposes, or with built-up production and non-production (including residential) buildings (constructions, structures) or building compounds, including land intended for the maintenance of buildings (constructions, structures) in accordance with their designation.

8.2. LAND USE RIGHT

Land may also be held by persons based on the right of land use (permanent or temporary, paid or free-of-charge, alienable or inalienable). It is allowed to alienate and sublease land plots held based on the temporary land use right (with certain exceptions), subject to redemption of the land use right from the state.

- Land plots may be granted to some categories of state land users based on the **right of permanent land use**. The right of permanent land use cannot belong to foreign land users.

The right of temporary land use may be paid or free-of-charge.

- **The right of temporary free-of-charge land use** is normally granted for up to 5 years (with some exceptions). Land plots under the right of temporary free-of-charge land use cannot be alienated or transferred for secondary land use with particular exceptions. Land plots under the right of temporary free-of-charge land use may be granted to Kazakh individuals and legal entities in cases provided for by legislation, including in the framework of a public-private partnership agreement and concession.

- **The right of temporary paid land use** (lease) may be short-term (up to 5 years) or long-term (from 5 to 49 years), except for the cases of granting the right of lease for the purpose of family-operated or private farming enterprises. The right of lease is granted to individuals, non-state Kazakhstan companies and international organizations.

8.3. AGRICULTURAL LANDS

To date, there is a moratorium on the granting of the right of private ownership to agricultural lands until the end of 2026.

Agricultural lands may be granted for lease (under the right of land use) only to Kazakhstan citizens and Kazakhstan companies without foreign participation.

Foreigners, stateless persons, foreign legal entities, Kazakhstan companies with foreign participation, international organizations, scientific centers with international participation, and qandases cannot hold agricultural lands under the right of private ownership or land use.

• • •

9. CURRENCY REGULATION

9.1. PARTICIPANTS IN CURRENCY RELATIONS

Pursuant to the RK currency legislation, specifically, the RK [Law](#) No. 167-VI on Currency Regulation and Currency Control of 2 July 2018 (the "**Currency Control Law**"), participants in currency relations are subdivided into the **RK residents** and **nonresidents**.

■ The **RK residents** are:

- RK nationals, except for the RK nationals permanently residing in a foreign state based on the right granted under the legislation of such foreign state;
- foreigners and stateless persons holding a document allowing them to permanently reside in the RK;
- legal entities (except for international organizations) organized under the RK legislation and located in the RK, including branches (representative offices) thereof;
- international organizations located in the RK, in case an international agreement on the establishment thereof provides for the status of a resident;
- foreign establishments of the RK;
- branches of foreign financial organizations, which may carry out banking and/or insurance activities in the RK territory; and
- branches (representative offices) of foreign non-financial organizations (the "**BFO**") that are permanent establishments of such foreign non-financial organizations in the RK in accordance with the Tax Code, except for the BFOs recognized as nonresidents (as defined below).

■ The **RK nonresidents** are:

- individuals who are not the RK residents;
- legal entities and organizations that do not form a legal entity, which were organized under the laws of foreign countries and are located outside the RK, including their branches/representative offices in the RK carrying out the activities that do not entail setting up of a permanent establishment of a nonresident in accordance with the Tax Code;
- BFOs, for which the nonresident status under the RK currency legislation is established by conditions of agreements concluded on behalf of the RK with foreign organizations, which entered into force prior to putting the Currency Control Law into effect³;

³ List of BFOs, for which the nonresident status under the RK legislation is established by conditions of agreements concluded on behalf of the RK with foreign organizations, is determined by an act of the RK Government.

- international organizations, unless an international agreement on organization thereof provides for otherwise;
- diplomatic and other official embassies of foreign states.

Settlements between residents may be effected only in the national currency – tenge. Branches/representative offices of foreign organizations may effect transactions with Kazakhstan residents in tenge only. However, branches/representative offices of foreign organizations may freely receive and transfer money under any currency operations with their parent nonresident companies. Operations between branches/representative offices of foreign organizations may also be effected in a foreign currency. Settlements between other residents and nonresidents may be effected in any currency.

The following requirements of the currency legislation applicable to residents do not cover branches/representative offices:

- export or import repatriation of national currency;
- record registration of currency operations involving transfer of capital;
- notification concerning opening of accounts with foreign banks; and
- provision of a permit to a foreign bank to transfer information relating to payment and/or transfer of money to the currency control authority dealing with currency operations, which may have the aim of transferring money across the border of Kazakhstan.

Nonresidents may receive and transfer dividends, interest and other income received on deposits, securities, loans and other currency operations with residents without limitations, if performed in accordance with the procedure established by legislation.

9.2. CURRENCY CONTROL

The principal currency control authority in Kazakhstan is the RK National Bank.

Residents fall under the requirement on mandatory repatriation of national and foreign currency, which they receive as payment for the export of goods (work, services), or which they transfer to nonresidents as settlement for the import of goods (work, services) in case the nonresidents fail to perform or incompletely perform their obligations within the transaction-stipulated deadlines.

The RK National Bank establishes uniform rules and conditions for the residents to obtain the **record numbers** for import and export currency contracts and the export-import control procedure intended to ensure residents' compliance with repatriation requirements, as well as the transaction threshold amount (equivalent of USD 50,000), which, if exceeded, requires obtaining the currency contract record number. In the event the currency contract for import and export does not contain information on the contract value as of the date of conclusion, such contract is subject to record registration.

Nonresidents may buy and sell foreign currency on the internal currency market without limitation on purposes (specifying, however, the purpose of the sale or purchase), and without presenting the currency contract or other documents substantiating the purpose of the sale and purchase of foreign currency. In case of purchasing foreign currency for national currency in an amount exceeding the equivalent of USD 100,000, the RK legal entity, which is not an authorized bank or authorized organization, is to attach to the application a copy of the currency contract under which the foreign currency is being purchased and/or other documents confirming the purpose of purchase and the amount of foreign currency.

According to the Currency Control Law, transactions (operations) between the RK residents and nonresidents on capital transfer are subject to record registration by assigning a record number to a currency contract.

The following currency operations between residents and nonresidents will be deemed as capital transfer transactions:

- financial loans;
- capital subscription;
- transactions with securities, shares and derivatives;
- acquisition of the right of ownership to immovable property, except for movable things that are deemed equal or referred to immovable property by the RK legislation;
- acquisition of exclusive rights to intellectual property items;
- transfer of money/property to perform obligations of a participant of joint activities and into trust management or trust;
- transfer of cash or financial instruments to professional participants of the securities market effecting currency operations at the request of their clients for the purpose of cash accounting and custody, and
- free-of-charge transfer of cash/currency valuables.

The RK residents entering into a currency transaction on capital transfer must apply for assignment of a record number to a currency contract to the territorial branch of the RK National Bank located at the place of location of the resident prior to commencing fulfillment of obligations under such currency contract, if the cost of the assets to be transferred under such transaction or the amount to be paid or repaid thereunder by or to the RK resident exceeds USD 500,000 (or its equivalent in any other currency). If the capital transfer transaction between the RK resident and nonresident contains no reference to an amount of transaction, such currency transaction will be subject to registration in any way. The RK banks are prohibited to make payments and transfers under contracts requiring a record number without obtaining such number.

The RK residents must apply to the RK National Bank for the record number prior to commencing fulfillment of obligations under the capital transfer transaction by one of the

parties thereto, i.e. prior to making a payment or transferring the assets (if any). The RK National Bank provides the record number within five (5) business days upon receipt of all necessary documents from the RK resident.

According to the Currency Control Law, currency operations effected by the AIFC participants in the AIFC territory do not fall under the requirements on:

- record registration of currency contracts on capital transfer;
- notification by authorized banks concerning currency operations
- notification concerning accounts opened with foreign banks.

The RK legal entities must obtain record numbers for their accounts opened with banks abroad of Kazakhstan. Such requirement also applies to branches and representative offices of the RK legal entities. The RK National Bank assigns a record number to a bank account within five (5) business days upon receipt of all necessary documents from the RK resident.

The unified principles of the currency policy within the EAEU are determined in the [Treaty](#) on the Eurasian Economic Union of 29 May 2014.

• • •

10. SECURITIES MARKET

The RK [Law](#) No. 461-II "On Securities Market" dated 2 July 2003 is the key act governing the securities market in Kazakhstan. The local securities market is subdivided as follows:

Organized market	Unorganized market
Transactions with securities are executed in accordance with the trade organizer's internal documents.	Transactions with securities are executed without observing the requirements established by the trade organizer's internal documents, i.e. OTC transactions.

Starting 1 January 2020, the RK Agency for Regulation and Development of the Financial Market ([ARD](#)) regulates and supervises the financial market, including the securities market and financial organizations.

All transactions with securities in Kazakhstan are subject to mandatory state registration. Starting 1 January 2019, the only organization to maintain the system of securities holders' registers is the Central Securities Depository ([CSD](#)).

Kazakhstan issuers may offer their securities in the territories and on stock exchanges of foreign states, subject to obtaining the ARD's permit and meeting the established conditions unless cases when at least 20% of such securities are concurrently offered in the territory of the Astana International Exchange ([AIX](#)). The most important of these conditions is the requirement to concurrently offer the securities on the domestic stock market, which is one of the measures to promote the local securities market development.

Kazakhstan law also does not provide for any prohibition for its residents to invest in foreign securities or other financial instruments abroad of Kazakhstan. However, under the RK Law on the Securities Market only qualified investors (such as banks, insurance companies and other entities holding the license on activity on the financial market and the securities market) have the right to purchase certain types of securities and financial instruments (Restricted instruments). No securities and financial instruments issued by non-Kazakhstan residents under foreign law and derivatives will be considered as Restricted instruments, if they are listed or admitted to trading on a Kazakhstan or foreign stock exchange or commodity exchange. Separate regulations are established with respect to Islamic securities. The key principles of Islamic finance are as follows:

- the issuer may not accrue interest as a percentage of the Islamic securities value and guarantee income on Islamic securities;
- the funds received as a result of issue and placement of Islamic securities cannot be used to finance activities related to the production of, or trade in, tobacco, alcohol, weapons, ammunition, or to gambling business, etc.

Islamic securities may be paid only in cash. Until an offered Islamic security is paid in full, the issuer may not issue order to charge it to the acquirer's personal account.

The Treaty on the Eurasian Economic Union of 29 May 2014 defines the key goals and principles of the agreed securities markets regulation. In order to attain these goals and principles, by 2025, the EAEU member states will harmonize their legislation in the financial market area in line with the EAEU international treaty and the Protocol on Financial Services.

At the moment, the main Kazakhstan's securities trading platform is the Kazakhstan Stock Exchange ([KASE](#)), whose members include Kazakhstan's leading banks and investment companies, and brokers.

The AIX was formed in 2017 as one of the main structures of the AIFC which was established in 2015 under the RK President's [Edict](#) No. 24 "On the Astana International Financial Centre" dated 19 May 2015. The AIX should become the most technologically advanced exchange in the region. The AIX's shareholders include AIFC, Goldman Sachs, Shanghai Stock Exchange, the Silk Road Fund and NASDAQ, which also provides AIX's trading platform. The AIX rules and regulations are placed on its website (www.aix.kz).

The AIX has launched in November 2018, when the IPO of Kazatomprom, a national company, took place. The first trading on the AIX took place on 14 November 2018. Such securities as shares and GDRs of NAC Kazatomprom JSC, euronotes of the RK ministry of Finance, bonds of Kazakhstan Temir Zholy JSC and shares of Polymetal are currently listed on the AIX. To date, the AIX's official [list](#) covers the securities of 80 different issuers. The trading exchange members are 26 companies represented by both Kazakhstan and international legal entities.

• • •

11. PERMITS AND NOTIFICATIONS

In order to conduct certain types of activities or operations defined by the RK [Law](#) No. 202-V "On Permits and Notifications" adopted on 16 May 2014, it is necessary to obtain a relevant **permit** or submit a **notification** to the authorized agencies.

11.1. CATEGORIES, CLASSES AND TYPES OF PERMITS

Kazakhstan issues **licenses** (first category permits) and **other permits** (second category).

Licenses are for conducting activities or operations in certain business areas: industry; oil and gas; use of nuclear power and cosmic space; transport; TV and radio broadcasting, and other.

Special types of licenses apply to export and import:

General license	Exclusive license	One-time license
A license granting the right to a foreign trade participant to export and/or import a certain type of licensable goods within certain quantities determined in the license.	A license granting a foreign trade participant an exclusive right to export or import a certain type of goods.	A license issued to a foreign trade participant based on a foreign trade transaction, the subject of which is the licensable goods, and entitling to export or import such goods within certain quantities.

11.2. PERMIT ISSUANCE CONDITIONS AND PROCEDURE

To be issued a permit, the applicant must meet the established qualification and permitting requirements.

ATTENTION!

Permits are issued on equal grounds and on equal terms, both to the RK residents and to foreign citizens, stateless persons and foreign companies that conform to requirements. Some types of activities may be performed only by the RK residents.

Some licenses are alienable and may be transferred by the licensee to another individual or legal entity.

Permits are valid in all Kazakhstan territory, except for the cases expressly provided for by legislation.

In order to conduct or terminate certain types of activities (operations) it is necessary to submit **notification** to the relevant authorized agencies.

To support private business development, Kazakhstan has been lately shortening the list of the types of activities or operations requiring permits and lightening the permitting and notification procedure load on entrepreneurs.

• • •

12. TAXATION

12.1. GENERAL PROVISIONS

Starting 1 January 2018, the key taxation provisions are governed by the new RK Tax [Code](#) No. 120-VI of 25 December 2017, which provides for the types of taxes and charges applicable depending on the presence of the taxable items and, in certain cases, on the type of performed activities.

Each type of taxes has a determined taxable item, amount of applicable tax rate and payment deadlines. Also provided for are different types of one-time fees (for state registration of legal entities, licensing fee, etc.) and charges (for environmental emissions, for outdoor advertising, etc.).

The Code has for the first time secured the principle of good faith actions (omissions) of taxpayers (tax agents) aimed to perform tax obligations, which does not allow deriving of profit by a taxpayer (tax agent) from illegal actions for the purpose of preferential tax treatment (tax saving) and tax reduction. The said principle also covers the tax authorities and obligates them to substantiate their arguments and disclose the circumstances of violating the tax legislation by a taxpayer. A violation must be described in the course of a tax inspection. All inaccuracies and unclear points of the tax legislation are interpreted in the taxpayer's (tax agent's) favor in the event of considering appeals against notices.

Kazakhstan has entered into bilateral international treaties for the avoidance of double taxation and reduction of income tax and capital tax rates with more than 50 states. The treaties apply to the income (corporate and individual) tax and property tax.

12.2. LIMITATION PERIOD

Starting from 2020, the limitation period for a tax obligation and claim was reduced from 5 to 3 years. However, the limitation period for taxpayers subject to tax monitoring and taxpayers carrying out activities under a subsoil use contract remains the same (5 years).

12.3. RESIDENT AND NONRESIDENT TAXATION

Taxation of nonresident's income depends on whether the nonresident has a permanent establishment in Kazakhstan.

Recognized as nonresident's **permanent establishment** is a permanent place of activities through which the nonresident performs, in full or in part, its business activities, including activities performed via an agent, for example: place of activities associated with the production, supply or sale of goods; place of activities associated with operation of game machines, computer networks and communication channels; place of management, department, bureau, office, room, agency, factory, studio, workshop, laboratory, shop, warehouse, etc.

As applied to the provision of services and performance of work, recognized as a permanent establishment is the place of services provision or work performance by employees or other personnel hired by the nonresident for such purposes, if the activities of such kind continue in the territory of Kazakhstan for more than 183 calendar days within any consecutive 12 month period of the date of commencement of entrepreneurial activities under a single project or related projects.

The branches/representative offices of foreign companies are also referred to nonresident's permanent establishments. A subsidiary of nonresident legal entity is deemed to be a permanent establishment, if its activities meet the dependent agent criteria.

Recognized as RK residents for taxation purposes are individuals permanently residing in Kazakhstan, or those not permanently residing, but whose center of vital interests is located in Kazakhstan.

An individual is recognized as permanently residing in Kazakhstan for a current tax period, if he/she is staying in the RK for at least 183 calendar days over any consecutive twelve-month period ending in the current tax period.

The center of vital interests is deemed to be located in the RK, if the following conditions are met concurrently:

- an individual is an RK citizen or holds an RK residence permit;
- an individual's family and/or close relatives reside in the RK;
- an individual and/or his/her family members own or otherwise hold immovable property in the RK, which is available at all times for the individual and/or his/her family members to reside.

12.4. CORPORATE INCOME TAX (CIT)

The CIT payers include Kazakh legal entities and foreign companies performing activities in Kazakhstan via a permanent establishment or receiving income through sources in the RK. The general CIT rate is 20% of the taxable income amount.

The CIT-taxable items are as follows:

- taxable income;
- income taxable at the source of payment; and
- net income of the foreign company operating in the RK via a permanent establishment.

In addition to CIT, the net income of foreign company operating in the RK via a permanent establishment is taxable at 15%.

The CIT on taxable income of foreign companies operating in Kazakhstan without forming a permanent establishment is withheld at the source of payment by the tax agent, i.e. the

person paying the income. Foreign companies' permanent establishment-unrelated income from Kazakh sources is taxable at the rates from 5% to 20%.

The payment procedure and rates of the CIT withheld at the source of payment from nonresident's income largely depend on whether there is a double taxation treaty between Kazakhstan and the relevant state.

The RK Tax Code provides for tax preferences for certain categories of local legal entities.

12.5. INDIVIDUAL INCOME TAX (IIT)

Individual income tax payers are individuals possessing taxable items in the form of:

- income taxable at the source of payment; or
- income not taxable at the source of payment.

The income is IIT-taxable at the rate of 10%, except for income in the form of dividends, which are taxable at 5%. The tax on income taxable at the source of payment is to be calculated, withheld and paid by tax agents.

12.6. VALUE ADDED TAX (VAT)

The VAT payers are Kazakh companies, nonresidents performing activities in Kazakhstan via branches/representative offices, and persons importing goods into the RK territory that got VAT-registered.

The items subject to VAT are the taxable turnover of goods (work, services) and taxable import. If the turnover of the persons mentioned above exceeds over a year the minimum turnover, such persons must get VAT-registered.

The minimum turnover is 20,000 MCI as established by the National Budget Law and in effect as of 1 January of a relevant financial year.

The VAT rate is 12%. The RK Tax Code establishes a list of goods (services) whose import and export is exempt from VAT.

The amounts and payment procedure for uniform rates of customs duties, taxes and overall customs payment are established by the customs legislation of the Eurasian Economic Union (EAEU) and/or by the customs legislation of the RK. The temporary export of goods from the RK territory to the territories of the EAEU member states, which will further be imported into the RK without changing their properties and characteristics, will not constitute the sales turnover.

The VAT on goods imported into the RK territory from the territory of another Customs Union member state is assessed by the customs service authorities at the rate of 12% applicable to the amount of taxable import.

12.7. EXCISE TAX

Subject to excise tax are the goods produced in the territory of Kazakhstan and imported into Kazakhstan, including:

- all kinds of ethyl alcohol;
- alcohol products;
- tobacco products, products with heated tobacco, and nicotine-containing liquids for use in electronic cigarettes;
- gasoline (except for aviation gasoline), diesel fuel, gasohol, benzanol, petroleum solvent, light hydrocarbons mixture, ecological fuel;
- certain types of motor vehicles;
- crude oil and gas condensate; and
- alcohol-containing medical designation products registered in Kazakhstan as a medication.

The excise tax rates are established as an absolute amount per unit of measure in physical terms, with respect to each type of products.

12.8. EXPORT RENT TAX

This tax applies to individuals and legal entities selling crude oil, crude oil products and coal for export, except for subsoil users exporting the quantities of crude oil and gas condensate produced under subsoil use contracts.

12.9. SUBSOIL USER TAXES AND SPECIAL CHARGES

Subsoil user must keep separate tax accounting to assess tax obligation in relation to activities carried out under each concluded subsoil use contract and in accordance with provision of the RK Tax Code.

As applied to contractual activities, separate tax accounting must be kept with respect to the below taxes and payments to the budget, including other taxes and payments to the budget assessed according to the procedure different from that established by the Tax Code, on the basis of the tax regime of subsoil use contracts determined by the provisions of the RK Tax Code.

When assessing the corporate income tax generally with respect to subsoil user's activities, not to be considered are the losses incurred under an individual subsoil use contract, which the subsoil user may compensate only on account of income received from activities under such individual subsoil use contract during subsequent tax periods pursuant to the provisions of the RK Tax Code.

■ **Subsoil User's Special Charges are as follows:**

- **Signature bonus** – subsoil user's one-time fixed payment for acquiring the right to use subsoil in the contract area, and payment in case of the contract area expansion.

The starting amount of signature bonus is established individually for each executed subsoil use contract, in accordance with the RK Tax Code.

- **Historical costs charge** – a fixed subsoil user's payment to compensate for the aggregate costs incurred by the state for the geological study of the contract area and deposit exploration prior to entering into the subsoil use contract. Starting 1 January 2018, the subsoil users who obtained licenses after 31 December 2017 are exempted from the payment of historical costs charges in accordance with the RK [Code](#) No. 125-VI "On Subsoil and Subsoil Use" dated 27 December 2017. The amount of historical costs is calculated by the authorized state agency.

- **Mineral extraction tax.** Mineral extraction tax is payable by subsoil users separately for each type of minerals, oil, groundwater or therapeutic muds extracted in the RK territory. In the course of activities under subsoil use contract, the monetary form of mineral extraction tax may be replaced by an in-kind form, upon an RK Government resolution.

- **Excess profit tax.** This tax is payable by subsoil users with respect to activities conducted under each particular subsoil use contract, except for certain established cases. For example, the excess profit tax was cancelled for the mining sector in 2018.

The taxable item is the part of net income for each individual contract over the tax period, which exceeds the amount equal to 25% of subsoil user's amount of deductions determined (net income and deductions) for the purposes of excess profit tax calculation.

The excess profit tax is payable by subsoil users according to a sliding scale (the higher the ratio between the aggregate annual income and deductions, the higher the rate). The tax rate ranges from 10% to 60%.

- **Alternative subsoil use tax.** In instances established by the tax legislation the subsoil user legal entities may apply an alternative subsoil use tax instead of paying historical costs charges, mineral extraction tax and excess profit tax.

Such right belongs to subsoil users who concluded contracts for the production and/or combined exploration and production of hydrocarbons on the continental shelf of the Republic of Kazakhstan and/or contracts for the production and/or exploration and production of hydrocarbons at the fields meeting the characteristics specified in the RK Tax Code.

- **Royalty/Kazakhstan's share of production.** Production-sharing agreements (contracts) and subsoil use contracts approved by the President of Kazakhstan may provide for a payment for the right to use subsoil in the form of royalty or the Kazakhstan's share of production. The Kazakhstan's share of production is

determined as the total cost of profit production to be divided between Kazakhstan and a subsoil user, less the subsoil user's share in the profit production.

12.10. SOCIAL TAX

The payers of social tax are Kazakh legal entities and foreign companies operating in Kazakhstan via a permanent establishment, or via a branch/representative office that does not give rise to the formation of a permanent establishment according to a double taxation avoidance treaty. The taxable items are employer's expenses paid to employees (resident and nonresident), and foreign personnel income, including employer's expenses paid for the purpose of training or advanced training of employees for production purposes, compensatory payments in the event of the employment contract cancellation on the employer's initiative, and compensatory payments for the unused labor leave. The general rate of social tax is 9.5%.

12.11. LAND TAX

Individuals, legal entities and individual entrepreneurs holding land plots (or a land share, in case of joint shared ownership over a land plot) based on the right of ownership, right of permanent land use or right of primary free-of-charge temporary land use, are the payers of land tax.

The taxable base for determining the land tax is the land plot's area. The base rates of land tax are established by the Tax Code and differ depending on the soil quality, location, water supply and other parameters of the land plot.

■ Single Tax

Starting 1 January 2020, Kazakhstan introduced a special tax regime (STR) for farm households or enterprises, which provides for a special procedure for budget settlements on the basis of payment of the single tax and covers the activities of farm households and enterprises involving the production and sale of agricultural goods, processing of own agricultural goods, and sale of derived products.

The taxable item for a taxpayer applying STR for farm households or enterprises on the basis of payment of the single tax is the income derived (to be derived) in and outside the Kazakhstan territory over a taxable period (income is determined the same way as in a simplified declaration: all profits without expenses for a year). The single tax rate is 0.5% of the taxable item.

Payers of the single tax do not pay other taxes and payments to the budget, including IIT, land tax, vehicle tax, property tax, social tax and environmental emission charges – according to activities of a farm household or enterprise covered by such STR.

12.12. VEHICLE TAX

This tax applies to individuals, legal entities and individual entrepreneurs holding certain types of transport vehicles based on the right of ownership, right of economic jurisdiction or right of operating management.

The RK Tax Code establishes MCI-based vehicle tax rates, which depend on the type of the transport vehicle, its designation, engine volume and year of manufacture.

12.13. PROPERTY TAX

■ Tax on Property (Buildings, Constructions) of Legal Entities and Individual Entrepreneurs

The tax payers are:

- legal entities (Kazakh or foreign) holding the taxable item based on the right of ownership, economic jurisdiction or operating management in the RK territory;
- individual entrepreneurs holding the taxable item based on the right of ownership in the RK territory; and
- concessionaires holding, based on the right of possession and use, a taxable item, which is the subject of concession under the concession agreement.

The general tax rate is 1.5% of the annual average value of the taxable items; however, the RK Tax Code also provides for other rates, depending on the taxpayer's status and type of activities.

■ Individual Property Tax

The tax is payable by individuals who own dwelling places, buildings, dacha buildings, garages and other constructions, structures or premises.

12.14. GAMBLING BUSINESS TAX

This tax applies to casino, gambling machines, sweepstake and bookmaker services. The tax rates are MCI-based and established with respect to taxable entities.

12.15. OTHER DEDUCTIONS/CONTRIBUTIONS

Besides IIT withheld by an employer (tax agent) from the employee's income, payable are social deductions to the State Social Insurance Fund, pension contributions to the State Accumulative Pension Fund and deductions to the Mandatory Social and Medical Insurance Fund.

■ Social deductions

According to the RK [Law](#) No. 286-VI "On Mandatory Social Insurance" dated 26 December 2019, the item subject to social deductions for employees and persons who have other remunerable work (elected, appointed or approved) is the employer's expenses paid by the employer in the form of income as remuneration, except for the income that is not subject to social deductions payable to the fund.

The social contribution rate for the participants of the mandatory social insurance system is no less than 3.5% of 1 MS and no more than 3.5% of 7 MS.

■ Mandatory pension contributions (MPC)

The MPC amount is 10% of monthly income, but no more than 50 MS. The maximum total annual income must not exceed 12 x 50 MS.

■ Mandatory occupational pension contributions (MOPC)

MOPC are made by agents at their own expense in favor of employees involved in work with harmful labor conditions, whose professions are stipulated by the list of productions, work and professions of employees approved by the RK Government.

The MOPC amount is 5% of the employee's monthly income taken to calculate pension contributions.

■ Mandatory social medical insurance (MSMI)

Mandatory social medical insurance is in effect since the beginning of 2020. According to the established rates of deductions, employers pay 3% of the employee's salary amount, but no more than 10 MS; employees, including the persons receiving income under civil contracts – 2% of their income (but no more than KZT 12,000); individual entrepreneurs, farm households and privately practicing persons – 5% of 1.4 MS; and direct payers – 5% of 1 MS.

■ Single overall payment (SOP)

Starting 2019, Kazakhstan introduced the SOP which provides for a simplified procedure for registration with the tax authority of persons unofficially carrying out business activities who do not use labor of wage workers and provide their services only to individuals who are not the tax agents.

The SOP unites four types of mandatory payments: IIT, social contributions to the state social insurance fund, pension contributions to the Unified Accumulative Pension Fund and deductions to the Mandatory Social and Medical Insurance Fund.

The monthly SOP rate in 2021 is:

- 1 MCI for individuals residing in the cities of national significance, capital and cities of regional significance;
- 0.5 MCI for individuals residing in other localities.

The SOP payer's income must not exceed 1,175 MCI per a year.

• • •

13. CUSTOMS REGULATION

13.1. GENERAL PROVISIONS

Kazakhstan, as well as Russia, Belarus, Armenia and Kyrgyzstan are currently the members of the Eurasian Economic Union enabling the freedom of movement for goods, services, capital and workforce and the coordinated, concerted or unified policy in the sectors of economy. The territories of Kazakhstan, Russia, Belarus, Armenia and Kyrgyzstan constitute a common customs territory in the framework of the Union where unified customs regulations, including the EAEU [Customs Code](#), Annex 1 to the Treaty on the EAEU Customs Code of 11 April 2017 and the EAEU Unified Commodity Nomenclature of Foreign Economic Activities/[Unified Customs Tariff](#) (approved by the Resolution No. 80 of the Eurasian Economic Commission Council of 14 September 2021) are in effect. The key aspects of unified customs regulation are stipulated by the [Treaty](#) on the Eurasian Economic Union of 29 May 2014 and the Customs Code of the Eurasian Economic Union, which served as the basis for the RK [Code](#) No. 123-VI "On Customs Regulation in the Republic of Kazakhstan ("Customs Code")" dated 26 December 2017.

13.2. CUSTOMS CHARGES

The following customs fees and duties are payable in the RK when performing customs clearance of goods:

- **customs declaration fee** is KZT 20,000 (approximately USD 50) per one declaration, regardless of the number of declared goods⁴;
- **import customs duties**. The basis for customs duties calculation, depending on the type of goods and applicable rates, is the *customs value of goods* and/or their *in kind physical characteristics* (quantity, weight, volume or other characteristics). Benefits may be granted in the form of deferral of, or exemption from, or installment of, customs duties payment;
- **export customs duties**. The export customs duties are established by the Order of the Minister of National Economy⁵ only for a small list of goods (oil and certain petroleum products, ferrous scrap, primary aluminum alloys, certain products made from ferrous metals, unprocessed sheep skin and other);
- **import VAT**. In Kazakhstan, the import VAT rate is 12%. In certain cases, exemption from import VAT is granted.

The import subject to VAT includes the customs value of imported goods, subject to the transfer pricing legislation, and the amounts of taxes and customs duties, special

⁴ [Decree](#) No. 171 of the Government of the Republic of Kazakhstan "On Approval of the Rates of Customs Fees Charged by the State Revenue Authority" dated 5 April 2018.

⁵ [Order](#) No. 81 of the Minister of National Economy of the Republic of Kazakhstan "On Approval of the List of Goods Eligible for the Export Customs Duties, Amounts of Rates and Their Effective Term, and the Rules for Calculating the Export Customs Duties Rates for Crude Oil and Petroleum Products" dated 17 February 2016.

antidumping and compensatory charges payable to the budget when importing goods to the RK, except for import VAT;

- **excise tax** on certain goods. The excisable goods are ethyl alcohol, alcohol products, tobacco products, products with heated tobacco, nicotine-containing liquids for use in electronic cigarettes, gasoline (except for aircraft gasoline), diesel fuel, crude oil, gas condensate, certain transport vehicles, medicines in the form of alcohol-containing medical products and other goods. The excise tax rates are established by the RK [Tax Code](#) or by the RK Government (depending on the types of goods).

Export of goods from Kazakhstan is subject to zero rate VAT in the event of the goods export fact confirmation.

Also payable in the RK are customs support charges and preliminary resolution fee.

13.3. CUSTOMS PROCEDURES

Kazakhstan applies 17 different customs procedures, of which the most commonly used are the *release for domestic consumption* and *temporary importation (admission)* of goods.

Other customs procedures are: customs warehouse, duty-free trade, export, customs transit, free warehouse, etc.

If **released for domestic consumption**, the imported goods acquire the status of EAEU goods and circulate freely in the entire EAEU territory without any customs restrictions.

This procedure implies payment of customs duties and taxes in full and compliance with the established restrictions and prohibitions and domestic market protection measures.

The **temporary importation (admission) of goods** is a customs procedure whereunder the imported goods retain the status of foreign goods. The maximum temporary importation period is 2 years with certain exceptions. Prior to expiration of the said period the goods must be placed under the re-exportation procedure (and later removed) or any other customs procedure applicable in this situation.

The goods temporary importation (admission) procedure implies a full or partial exemption from import customs duties and taxes. The list of goods falling under full exemption is determined by the RK international agreements and/or by the Eurasian Economic Commission⁶.

The goods beyond this list fall under partial exemption at 3% per month of the amount of the customs duties and taxes, which would be payable in case of release of goods for domestic consumption.

⁶ Resolution No. 109 of the Eurasian Economic Commission Council "On Certain Issues of Applying Temporary Importation (Admission) Procedure" dated 20 December 2017 (Moscow).

13.4. CUSTOMS DECLARATION

The goods imported by legal entities into the customs territory of the Eurasian Economic Union are subject to customs declaration.

Preliminary, incomplete, periodic or temporary customs declaration may be allowed in established cases. Certain goods may be released before filing a customs declaration.

The time required for release of goods cannot exceed 4 hours from the moment of registering a customs declaration, however, in certain instances such period may be greater or extended.

• • •

14. PUBLIC-PRIVATE PARTNERSHIP (PPP)

Public-private partnership (PPP) is currently governed by the RK Law on Public-Private Partnership dated 31 October 2015. Concession projects being a variation of PPP are governed by the special RK [Law](#) No. 167-III "On concessions" dated 7 July 2006. General PPP provisions are also included in the RK [Entrepreneurial Code](#) No. 375-V dated 29 October 2015.

PPP projects may be subdivided into national and local projects. Such subdivision depends on the right of ownership (national or communal) over property originating as a result of implementing a PPP project, as well as the beneficiaries of a specific PPP project.

According to the implementation methods, PPP projects may be divided into institutional and contract projects. An institutional project contemplates setting up of a legal entity by a private partner and the public partner.

Contract PPP is implemented by way of:

- concession;
- trust management of state-owned property;
- property lease of state-owned property;
- leasing;
- contracts entered into for the development of technologies, pilot production, experimental-industrial trials and small-scale production;
- life cycle contract;
- service contract; and
- other contracts meeting the features of PPP.

Sources for reimbursement of expenses and deriving of income by the PPP subjects are as follows:

- sale of goods, work and services in the course of operation of a PPP facility;
- state subsidies in established cases;
- compensation of investment costs;
- compensation of operating costs;
- consideration for the management of a PPP facility owned by the state and lease payment for using a PPP facility; and
- availability payment.

The list of PPP projects contemplated for implementation is formed by the central authorized agency for state planning or by local executive agencies and must be placed on a website

of a special public-private partnership development center (currently, Kazakhstan Public-Private Partnership Center JSC, which was established in 2008).

Local PPP projects are normally implemented on the basis of model documentation. National PPP projects are implemented on the basis of custom-tailored documentation.

Special category of PPP projects is represented by PPP projects of special significance. The list of such projects is approved by the Government.

ATTENTION!

PPP projects are implemented in all economy branches (spheres). Facilities included in a special [list](#) determined by the RK Government cannot be transferred for the purposes of PPP project implementation. The term of implementing a PPP project may vary from three to thirty years, depending on the project specifics.

A private partner is determined applying the methods, as follows:

- **tender**, including open tender in accordance with a simplified procedure and applying two-stage procedures. A tender to determine a private partner may be closed with respect to facilities falling within the list determined by the RK Government; and
- **direct negotiations**
- **auction.**

A private partner may be determined applying a simplified tender only for local PPP projects. A private partner is determined and PPP agreement is concluded under informatization service model in accordance with the RK legislation on informatization.

To partake in a tender or direct negotiations to determine a private partner a potential private partner must meet the general qualification requirements, as follows:

- to be legally capable (for legal entities) and be able to act (for individual entrepreneurs);
- to be capable of paying and have no tax debts above 6 MCI;
- to have financial and/or material and/or labor resources required to perform obligations under PPP agreement;
- not to be subject to bankruptcy or liquidation procedure; its property, the book value of which exceeds 10% of the value of respective fixed assets, must not be attached, and its financial and economic activities must not be suspended in accordance with the RK legislation;
- not to be held liable for a failure to perform and/or improper performance of obligations under PPP agreements concluded within the past three years based

on a court judgment, which entered into legal force, on recognition as a bad faith potential private partner;

- founders and chief executives of a potential private partner must not be included in the list of organizations and persons connected with financing of terrorism and extremism;
- not to be included in the register of bad faith participants of public procurement; and
- to have own or own and borrowed funds in the amount of at least 20% of the value of a PPP facility.

The RK laws may provide for any additional (special) qualification requirements to potential private partners.

A special regime is established for the PPP projects of special significance. Thus, for example, the RK legislation provides for conclusion of a direct agreement among the public partner, private partner and creditors of the private partner. Such agreement contains, *inter alia*, the creditors' right to claim for replacement of the private partner in certain instances and describes the procedure for replacing the private partner (in concession projects of special significance, a direct agreement also provides for the creditors' right to appoint a temporary manager and determine its authorities).

With respect to concession projects of special significance, parties to a concession agreement may select foreign arbitration to resolve disputes under the agreement, provided that at least one of the shareholders (participants) of a concessionaire is the RK nonresident. Please note that foreign arbitration may be possible for PPP agreements if (1) private partner itself or one of its participants holding more than 25% participation interest or shares is a nonresident, and (2) value of a PPP project exceeds the threshold of 4,000 MCI (approximately USD 26 mln).

We mentioned above that Kazakhstan established a special organization on concession matters in 2008, which is [Kazakhstan Public-Private Partnership Center JSC \(Kazakhstan PPP Center\)](#). The key subject of activities of this organization is the expert examination review and monitoring of concession projects. Kazakhstan also established Public Private Partnership Advisory Center (later renamed as the Kazakhstan Project Preparation Fund LLP), which was defined as the only legal entity providing advisory support to concession projects on the part of the grantor.

On 10 July 2015, AEQUITAS and Kazakhstan Public-Private Partnership Center JSC entered into a partnership agreement whereunder AEQUITAS is the Center's partner for joint research projects and actions to develop the PPP legislative and institutional framework.

Over the recent years, AEQUITAS has been acting as the local counsel for international development banks (EBRD, EDB and IsDB) in the framework of project financing of the first concession project of special significance BAKAD (construction and operation of a toll high-speed ring motor road). The project is implemented according to the 20-year concession

agreement under the WTO model (construction-transfer-operation) entered into between the RK and BAKAD Investment and Operation LLP set up by a consortium of foreign sponsors.

• • •

15. LABOR RELATIONS AND FOREIGN LABOR ENGAGEMENT

15.1. LEGAL REGULATION OF LABOR RELATIONS

Labor relations in Kazakhstan are regulated by the RK [Labor Code](#) No. 414-V adopted on 23 November 2015, Law No. 482-V "On [Population Employment](#)" dated 6 April 2016, Law No. 477-IV "[On Population Migration](#)" dated 22 July 2011, Law No. 211-V "[On Trade Unions](#)" dated 27 June 2014, Law No. 314-V "[On Minimum Social Standards and Their Guarantees](#)" dated 19 May 2015 and by other laws and subordinate acts.

Starting 1 January 2015, the EAEU put into effect the provisions of the EAEU Treaty dated 29 May 2014 providing for certain mitigations in the employment area for migrant employees from the Union member states. In November 2015, the norms of national legislation were brought in line with the norms of the World Trade Organization (WTO) agreements.

15.2. EMPLOYMENT CONTRACT

Labor relations between the employee and employer are to be formalized on a mandatory basis by a written **employment contract**. An employment contract may be concluded in the form of an electronic document using an electronic digital signature (EDS).

An employment contract may be concluded for a certain term or on a termless basis.

Employment contracts with RK nonresidents are not allowed to be executed (with certain exceptions) until the nonresident obtains a work permit, independent job placement permit or labor immigrant permit issued by internal affairs authorities.

15.3. PRINCIPAL LABOR CONDITIONS

The labor conditions must be agreed upon by the parties when entering into the employment contract, and cannot deteriorate the employee's position as compared to the statutory requirements.

The principal labor conditions in the RK are, without limitation, as follows:

- normal work time duration cannot exceed 40 hours per week;
- minimum duration of the principal paid annual labor leave is 24 calendar days;
- maximum allowable duration of overtime work is 2 hours per day, 12 hours per month and 120 hours per year, overtime payable at no less than 1.5 rate or with provision of rest hours, at least one hour per one hour of overtime work;
- engagement to work on days off and holidays is performed in accordance with a special procedure, with at least 1.5 remuneration;

- salary is set and is paid monthly in tenge; and
- employer is responsible for ensuring employees' labor safety conditions.

The legislation also provides for other requirements binding on the parties to the employment contract.

Work on rotation, remote work, work with hazardous labor conditions, work of women, other persons with family obligations, foreign employees of governmental agencies, foreign employees arriving to Kazakhstan under intra-corporate transfer, and work of some other categories of employees is subject to special labor conditions requirements.

Beside this, there are nuances in applying the above requirements, which need to be taken into consideration when entering into the employment contract and in the process of work.

15.4. UNIFIED ACCOUNTING SYSTEM OF EMPLOYMENT CONTRACTS

For the purpose of automated accounting of employment contracts, labor activities and number of employees Kazakhstan created the Unified Accounting System of Employment Contracts (UASEC). Starting from September 2020, employers must introduce the following data into UASEC on the labor exchange website (www.enbek.kz): parties' details, labor function (position, specialty, profession, qualification), place of work performance, employment contract term, work commencement date, date of employment contract and its sequence number, work time and rest time regimes, including any changes in such data, as well as information about the employee's maternity leave (leave in connection with adoption of a newborn child) and unpaid childcare leave until the child reaches the age of 3, and termination of an employment contract.

Information introduced into UASEC relates to employment contracts entered into before 18 September 2020, which remain in effect in an employing company at present, as well as the employment contracts entered into after 18 September 2020. Information on the previously concluded employment contracts must be introduced until 18 September 2021 by the employers who have less than 2,000 employees; in case the staff number exceeds 2,000 employees, this term is extended until 18 September 2022. Information about employment contracts entered into after 18 September 2020 must be introduced into UASEC within 5 business days, on changes in an employment contract – within 15 calendar days, on cancellation of an employment contract – within 3 business days.

15.5. USE OF FOREIGN CITIZENS' LABOR IN KAZAKHSTAN

■ Foreign Labor Engagement Permit

Foreign employees may enter Kazakhstan for independent job placement or on employer's invitation, including in the framework of an intra-corporate transfer. The following permitting documents are stipulated for foreign labor engagement:

- permit for foreign labor engagement, including in the framework of an intra-corporate transfer, issued to employers (work permit); and
- certificate of qualification compliance in priority sectors (types of economic activities) and occupations in demand therein, issued directly to employees for independent job placement (independent job placement certificate).

Starting from spring 2020, permits are issued to employers for foreign labor engagement (including the permits issued in the framework of intra-corporate transfer) only in the electronic form via the RK e-Government portal (www.egov.kz, www.elicense). Therefore, in order to interact with the portal for these purposes employers need to register electronic digital signatures. Transition to the electronic form of interaction, among other things, allows service recipients to keep track of the whole process and the current status of provision of the state service online.

In order to determine the conditions and procedure for the issuance and extension of the permits, the following four categories of employees are defined:

Category	Employees
I	CEOs and their deputies
II	heads of structural subdivisions who meet the established qualification requirements and qualification standards
III	specialists who meet the established qualification requirements and qualification standards
IV	qualified workers who meet the established qualification requirements and qualification standards

Foreign employees may be engaged under an intra-corporate transfer only if they are employed by companies organized in the territory of WTO countries and sent to such companies' Kazakh structural subdivisions or subsidiaries; such employees must also belong to certain categories (executive, manager or specialist).

■ **Foreigners Carrying Out Activities without Special Permits**

The RK legislation establishes categories of nonresidents who can carry out labor activities without special permit. These include, but are not limited to, foreign employees who are:

- citizens of the EAEU member states;
- CEOs of foreign legal entities' branches or representative offices, and CEOs and their deputies of Kazakh legal entities with 100% foreign participation in the charter capital;
- members of sea, river, air, railway and motor transport crews;
- nonresidents permanently residing in Kazakhstan;
- business immigrants; and

- on a business-purpose trip for a period not to exceed in aggregate 120 calendar days over one calendar year.

■ **Conditions for Issuing Foreign Labor Engagement Permits**

The quantity of foreign labor engaged in Kazakhstan is subject to quota (except for foreign labor engagement in the framework of intra-corporate transfer in the sectors of economy determined by the Government, which is performed without a quota). The quota is established by the RK Government on an annual basis as a percentage of labor force, and includes as follows:

- foreign labor engagement quota by the type of economic activities;
- foreign labor engagement quota by the country of origin⁷, provided there exist international treaties on cooperation in the field of labor migration and social protection of migrant workers ratified by Kazakhstan; and
- labor immigrant engagement quota⁸.

The authorized agency issues work permits to employers in case the domestic labor market cannot satisfy the demand for labor and provided the following ratios are met (with some exceptions):

- Kazakhstan citizens must constitute at least 70% of the staff-list number of the first and second category employees;
- Kazakhstan citizens must constitute at least 90% of the staff-list number of the third and fourth category employees.

When issuing permits, employers encounter a requirement on replacement of foreign employees of the fourth category by local employees within a period from 6 to 12 months of the moment of issuing a relevant permit. Failure to fulfil this requirement, same as establishment of the fact by the authorized agency that an employer engaged a foreign employee with a profession or specialty, which does not correspond to the profession or specialty specified in the permit, entails rejection of issuing of new permits to the employer. In the latter case, the authorized agency also revokes the previously issued permits which are currently in effect.

To be issued work permits (except for an intra-corporate transfer), employers must pay a tax charge according to the rates that differ depending on the types of employer's economic activities and categories of foreign employees.

⁷ The country of origin means the country whose citizen is the foreigner performing labor activities in Kazakhstan.

⁸ Labor immigrants are immigrants arriving to Kazakhstan as domestic workers to perform work (provide services) within the household of an individual employer based on a respective permit. Such individual employer cannot enter into employment contracts for household work (services) with more than 5 labor immigrants at a time.

Work permits for the first category employees (CEOs and their deputies) are issued for the term of 1, 2 or 3 years, for other categories of employees – for a 12-month term, with or without the right of extension, depending on the foreign employee's category.

Permits to foreign employees engaged under an intra-corporate transfer are issued for a maximum term (total period with all possible extensions) not to exceed four years. Beside the need to obtain foreign labor engagement permits, the intra-corporate transfer obligates the employer to also notify the employment authorities within ten days of the moment the foreign employee crosses the RK state border.

Independent job placement certificates are issued to foreign employees in two stages: initially for a term of 3 months and after executing an employment contract with a local employer – for a term not to exceed 3 years.

■ **Conditions for issuance of permits to labor immigrants**

Labor immigrants are issued permits provided they are citizens of the countries with which Kazakhstan has entered into agreements on visa-free entry and stay, enabling them to stay in the RK without visas for a period of not less than three months. In order to obtain the permit, they must present to the internal affairs authorities a certificate of clean criminal record, a medical certificate confirming absence of diseases preventing work in the chosen specialty and a medical insurance covering primary medical care and inpatient care, and make an advance payment of individual income tax for the period specified in the permit application.

Labor immigrant permits are issued for the period specified in the permit application, which may be one, two or three months. The maximum period of labor immigrant's continuous temporary residence in Kazakhstan cannot exceed twelve months. A new permit may be issued to the labor immigrant not earlier than thirty calendar days after the previous permit expiration.

One individual employer cannot enter into employment contracts for household work (services) with more than five labor immigrants at a time.

• • •

16. PROCEDURE FOR FOREIGN CITIZENS' ENTRY AND STAY IN KAZAKHSTAN

16.1. VISA REGIME

The migration legislation envisages visa regime for foreign citizens' stay in Kazakhstan. Kazakhstan has concluded bilateral mutual visa-free visit treaties with more than 40 states.

Visas are issued abroad by Kazakh foreign establishments. In the territory of Kazakhstan, visas may be issued by the Consular Service Department of the RK Ministry of Foreign Affairs or by Migration Police Administrations of the RK Ministry of Internal Affairs. In case a properly executed invitation by a Kazakh party is in place, visa may be issued at the local airports. Starting from 2020, it is possible to obtain single-entry electronic tourist and business visas and medical treatment visas via the visa-and-migration portal of the RK e-Government (www.vmp.gov.kz), however, only for the citizens of 109 countries (People's Democratic Republic of Algeria, Republic of Angola, Principality of Andorra, Commonwealth of the Bahamas, Bosnia and Herzegovina, Bolivarian Republic of Venezuela, Republic of Guinea, Grenada, Arab Republic of Egypt, Islamic Republic of Iran, Kingdom of Cambodia, Republic of Cuba, Lebanese Republic, Republic of Maldives, Republic of Seychelles, United Republic of Tanzania, Turkmenistan, Montenegro, Republic of South Africa, Jamaica, etc.).

The visa category, recipient, number of entries, term, period of stay in the territory of the Republic of Kazakhstan and grounds for visa issuance are determined depending on the purposes of stay in Kazakhstan. The most business-relevant visa categories are investor visas, business travel visas and labor activities visas. Visas may be issued for single or multiple entries.

Visas	Issued to
Investor visas	CEOs and managers of foreign companies participating in investments in Kazakhstan's economy, and their family members
Business travel visas	foreign citizens traveling to, or staying in, Kazakhstan for business purposes and to founders or members of the board of directors; for participation in business negotiations; conclusion of contracts; installation, repair and maintenance of equipment, participation in youth, student or school exchange programs; lecturing or teaching at educational institutions; provision of consulting or audit services; conveying of humanitarian aid; participation in conferences, symposia, forums, exhibitions and concerts, cultural, scientific, sports and other events; and participation in meetings, organizations, round tables, and experts meetings
Labor activities visas	foreign citizens traveling to Kazakhstan in order to work, if they have a work permit (visas issued both to foreign employees and their family members coming with them) or an independent job placement certificate; or to perform entrepreneurial activities (visas issued to business immigrants)

A simplified procedure for obtaining Kazakh visas is envisaged for certain categories of individuals, including citizens of more than 40 developed countries (USA, Canada, United Kingdom, Japan, Israel, Denmark, Australia, Bulgaria, Norway, Poland, Singapore, Spain, France, Germany, Korea, and other) who can receive short term RK visas without invitation (visa support).

Moreover, the citizens of more than 50 countries that demonstrated the highest investment activity in Kazakhstan (these are: Commonwealth of Australia, United States of America, Republic of Austria, Kingdom of Bahrain, Kingdom of Belgium, Republic of Bulgaria, United Arab Emirates, the Holy See (Vatican City), Socialist Republic of Vietnam, Federal Republic of Germany, Hellenic Republic, Kingdom of Denmark, New Zealand, Japan, State of Israel, Republic of Ireland, Republic of Iceland, Kingdom of Spain, Republic of Indonesia, Italian Republic, Canada, State of Qatar, Republic of Cyprus, Republic of Columbia, Republic of Korea, State of Kuwait, Republic of Latvia, Republic of Lithuania, Principality of Liechtenstein, Grand Duchy of Luxembourg, Hungary, Malaysia, Republic of Malta, United Mexican States, Principality of Monaco, Kingdom of the Netherlands, Kingdom of Norway, Sultanate of Oman, Republic of Poland, Portuguese Republic, Romania, Kingdom of Saudi Arabia, Republic of Singapore, Slovak Republic, Republic of Slovenia, Kingdom of Thailand, Republic of Turkey, United Kingdom of Great Britain and Northern Ireland, Republic of the Philippines, Republic of Finland, French Republic, Republic of Croatia, Czech Republic, Republic of Chile, Swiss Confederation, Kingdom of Sweden, and Republic of Estonia) are allowed visa-free entry into Kazakhstan, if their term of stay does not exceed 30 calendar days, and 90 calendar days in total within each period of 180 calendar days. A longer stay requires issuance of business or investment visas.

16.2. TERM OF STAY OF FOREIGN CITIZENS IN KAZAKHSTAN

Foreign citizens temporarily staying in Kazakhstan must leave the country until visa expiration. The term of temporary stay in Kazakhstan of foreign citizens who arrived on a visa-free basis cannot exceed 30 calendar days, and for citizens of the Union member states – 90 calendar days, of the date of crossing the state border of the Republic of Kazakhstan, unless any other procedure is established by international agreements of Kazakhstan with a respective country or the Government of the Republic of Kazakhstan (e.g. pursuant to the EAEU Treaty, the period of temporary stay of foreign workers who are citizens of the Union member states is determined by the term of an employment or a civil contract; according to an agreement with the Kyrgyz Republic, the term of stay in the Kazakhstan territory may be 90 days with a possibility to extend for the same term).

Immigrants who have been issued a temporary residence permit must leave Kazakhstan before expiration of its term.

In exceptional cases (in the event of social, natural, man-made emergency situations or announcement of the state of emergency in connection with a justifiable threat of a natural calamity or a large-scale accident (disaster) and interruption of the transport operating

schedule), the term of stay is extended for a period required to organize the departure, but for no more than 30 calendar days.

When crossing the state border, foreigners arriving with the RK visa are automatically counted via the [visa-and-migration portal](#) of the "Berkut" Unified Information System at the address specified by the host party when executing an invitation. The host party (hotels, hostels, owners of apartments rented by foreigners, medical and preventive treatment facilities, educational organizations, employers and other legal entities and individuals) must notify the internal affairs authority about the nonresidents staying with them within 3 business days of the date of arrival. The notification procedure is automated and implemented via the "Berkut" UIS. For this purpose, it is necessary to do the following on the said website:

- to fill out information on a foreigner and his / her children, if necessary;
- to sign the filled out application form using EDS; and
- 15 minutes later, to obtain the prepared document which will be stored on the personal account.

An alternative method of notifying about the staying nonresidents may be the submission of a notice when directly applying to a subdivision of the migration service or sending of a notice by post.

In the event the inviting party fails to perform the obligations to timely inform about the immigrants staying with the inviting party, take measures to execute the documents giving the right to stay in Kazakhstan and ensure their exit from the country upon expiration of the established term of stay, the Kazakhstan legislation provides for administrative liability. The fact of bringing the inviting party to administrative liability twice or more within 12 consecutive calendar months serves as a ground for the authorized agencies to reject consideration of invitations of foreigners to the Republic of Kazakhstan.

• • •

17. PERSONAL DATA AND PROTECTION THEREOF

17.1. GENERAL PROVISIONS

The issues of personal data and their protection in Kazakhstan are regulated by the RK [Law](#) No. 94-V "On Personal Data and Protection Thereof" dated 21 May 2013, RK [Law](#) No. 418-V "On Informatization" dated 24 November 2015 and other regulatory legal acts. The key purport of legislation in this area is to ensure protection of human and civil rights and freedoms in the course of personal data collection and processing.

Personal data are data relating to a certain individual (the subject), which are fixed on an electronic, paper and/or other tangible medium.

Personal data (including those placed on electronic information resources) are subdivided, according to their accessibility, into public-access data and restricted-access data. The list of personal data is independently determined by the **owner (operator) of the personal data containing base** (a company, individual or governmental agency) in a volume necessary and sufficient to attain the pursued objectives and proceeding from the purposes of such data collection.

The list of individual personal data included in state electronic information resources is approved by Kazakhstan Government. The owners (operators), as well as third parties gaining access to restricted-access personal data, must ensure their confidentiality.

Personal data are to be collected and processed, including with the use of information systems, on consent of the subject or his/her legitimate representative (in writing, in the form of an electronic document, by way of service of ensuring safety of personal data or by any other methods applying the elements of protective actions (electronic digital signature) that do not contradict the Kazakhstan legislation), except for certain cases, which mostly relate to public interests protection.

Personal data must be stored by the owner (operator), or a third party, in a database to be located in the RK territory.

Personal data are transferred to the territory of foreign states only in case such states ensure personal data protection, for example, in the framework of the [Convention](#) on the Protection of Individuals with Regard to Automatic Processing of Personal Data (Strasbourg, 28 January 1981), including the [Additional Protocol](#) to the Convention (Strasbourg, 8 November 2001), or in case the subject or his/her legitimate representative consents thereto in writing. The specifics of cross-border transfer of proprietary information about subscribers and/or users of communication services are determined by the RK [Law](#) "On Communication" dated 5 July 2004.

Personal data may be used only for the purposes of their collection as stated by owner (operator).

Dissemination of personal data is allowable, unless it infringes upon the rights and freedoms

of the subject or affects the legitimate interests of other individuals or legal entities. In cases going beyond the purposes of their collection personal data may be disseminated on written consent of the subject or his/her legitimate representative.

17.2. PERSONAL DATA PROTECTION

From the moment of personal data collection and until their destruction, the owner (operator) of the personal data containing base must take the following measures:

- isolate personal data from other information;
- determine the places (media) of personal data storage and prepare a list of persons performing personal data collection and processing or having access thereto; and
- when storing the media, provide conditions ensuring personal data safety and precluding from unauthorized access thereto.

Furthermore, the owners (operators) of personal data containing bases who are employers must:

- approve the list of personal data;
- determine the list of persons performing personal data collection and processing or having access thereto;
- isolate personal data from other information;
- ensure availability of and compliance with the relevant employer's acts governing personal data protection issues; and
- determine the list of persons in charge of the above measures implementation.

The legislation provides for criminal and administrative liability for violating the legislation on personal data and protection thereof.

The prosecution agencies carry out supreme supervision over legality in the area of personal data and protection thereof. The governmental agency authorized to exercise control over compliance with legislation in a respective part is the Ministry of Digital Development, Innovations and Aerospace Industry of Kazakhstan.

• • •

18. INTELLECTUAL PROPERTY

18.1. GENERAL PROVISIONS

■ Legal Regulation of Intellectual Property

The key legislative acts in the field of intellectual property are the RK [Civil Code](#), [Law](#) No. 6-I "On Copyright and Neighboring Rights" dated 10 June 1996, [Law](#) No. 456-I "On Trademarks, Service Marks and Appellations of Origin" dated 26 July 1999, and the [Law](#) No. 427-I "Patent Law of the Republic of Kazakhstan" dated 16 July 1999. Kazakhstan is a party to the Convention Establishing the World Intellectual Property Organization (WIPO), Paris Convention for the Protection of Industrial Property, Eurasian Patent Convention, Madrid Agreement Concerning the International Registration of Marks and Singapore Treaty on the Law of Trademarks, as well as a number of other international acts in the field of intellectual property protection.

The authority authorized to perform registration of items of intellectual property rights is National Institute of Intellectual Property, which is subordinated to the RK Ministry of Justice.

■ Intellectual Property Items. The protected **intellectual property items** are as follows:

- **results of intellectual creative activities** (works of science, literature and art; performances, stagings, phonograms; inventions, industrial designs; undisclosed information, etc.);
- **means of individualization** of participants in civil circulation, goods, work or services (trade names; trademarks, etc.).

The rights to intellectual property items arise by virtue of the fact of their creation or as a result of their legal protection based on a national or international registration.

The national state registers of trademarks, inventions, industrial designs and other items of intellectual property rights are available at <https://gosreestr.kazpatent.kz>.

18.2. LEGAL PROTECTION OF TRADEMARKS

Legally protected are trademarks (service marks) registered by the authorized agency or by an international organization under an international treaty. The trademark right remains in effect for 10 years of the date of application submission, and may be extended. The trademark and trademark use right is transferable based on relevant agreements, which are subject to mandatory registration with the authorized agency.

A court may annul the trademark registration upon a claim from the party concerned in the event such trademark has not been used without a valid reason for three years preceding the date of the claim.

While being a member of the Eurasian Economic Union, Kazakhstan applies the regional principle of trademark rights exhaustion in relation to the member states of the Union. The goods lawfully put into civil circulation in the territories of the Eurasian Economic Union

member states by the trademark owner or on the latter's consent may further freely circulate within the Eurasian Economic Union. In relation to other countries, Kazakhstan applies the national principle of trademark rights exhaustion, which requires obtainment of the right holder's consent to each case of introducing goods into circulation in the Kazakhstan territory.

18.3. RIGHT TO UNDISCLOSED INFORMATION PROTECTION

Information constituting an official or commercial secret is legally protected, if it has an actual or potential commercial value due to being unknown to third parties and is not freely accessible on lawful grounds and the holder of information takes measures to protect its confidentiality. Protected is not any information, but only technical, organizational or commercial information that meets the above criteria, including trade secrets.

The right to protection of undisclosed information against its unlawful use arises regardless of any formalities completed towards such information (registration, obtainment of a certificate). A person possessing undisclosed information may transfer all or a part of the data to another person under a license agreement.

18.4. RIGHTS TO INVENTION, UTILITY MODEL OR INDUSTRIAL DESIGN

The right to invention, utility model or industrial design is protected by a patent. In order to be afforded legal protection, an invention, utility model or industrial design must be recognized as new, possessing inventive level, industrially applicable and original.

Effective in the territory of Kazakhstan are invention patents, utility model patents and industrial design patents issued by the authorized agency, as well as patents issued in a foreign state or by an international organization, in cases provided for by international treaties. The protection of an invention, utility model or industrial design is in effect from the date of filing the application with the authorized agency. The rights can be protected after the patent is issued.

Invention patents are effective for 20 years; utility model patents – for 5 years; and industrial design patents – for 15 years. The said patent terms are calculated from the application submission date and may be extended. Once the validity term expires and in the event of early termination of exclusive rights, the invention, utility model and industrial design become the public domain.

Patent rights may be assigned based on the relevant agreements, including license and sub-license agreements. The agreements must be in writing and are subject to registration with the authorized agency.

18.5. COPYRIGHT AND NEIGHBORING RIGHTS

Copyright covers economic and moral rights of the authors to scientific, literary and artistic works that are the outcome of creative effort whatever their purpose, content, merit, or manner or form of expression. Copyright protection is afforded regardless of the fact of registration. As a general rule, copyright is in effect throughout the author's lifetime and for 70 years after his death. The authorship, author's name and inviolability of work are protected on a termless basis.

Neighboring rights cover stagings, performances, phonograms and broadcasts by on-air and cablecasting organizations, regardless of their purpose, content and merit, or manner or form of expression. No registration or any other formalities are required for the arising and exercise of the neighboring rights.

• • •

19. DISPUTE RESOLUTION; RECOGNITION AND ENFORCEMENT OF FOREIGN JUDGMENTS AND ARBITRAL AWARDS

19.1. JUDICIAL SYSTEM OF THE REPUBLIC OF KAZAKHSTAN

■ General Provisions

The principal legislative acts governing Kazakhstan's judicial system are the [Constitution](#) of the Republic of Kazakhstan and the RK Constitutional [Law](#) No. 132-II "On Judicial System and Status of Judges in the Republic of Kazakhstan" dated 25 December 2000. The RK [Civil Procedure Code](#) No. 377-V dated 31 October 2015 establishes the procedure in civil cases. Judicial proceedings in administrative cases are regulated by the recently adopted Administrative Procedure Code No. 350-VI dated 29 June 2020.

Kazakhstan's judicial system is comprised of three level courts:

First instance courts	Courts of appellate instance	The court of cassation instance
district courts and courts deemed equivalent thereto	oblast courts and courts deemed equivalent thereto	RK Supreme Court , the highest judicial body

Kazakhstan has general and specialized courts (a specialized bench in general courts), whose competence encompasses review of certain categories of disputes (economic, administrative, investment, etc.).

Disputes between entrepreneurs and legal entities, as well as corporate disputes subjected to the rules of the first instance court, are reviewed by specialized inter-district economic courts.

According to the rules of the first instance court, investment disputes⁹ (except for disputes involving a large investor) are considered by the Nur-Sultan City [Court](#). This court also considers other disputes between investors and governmental agencies associated with the investor's investment activities and involving:

- foreign legal entity (its branch/representative office) carrying out entrepreneurial activities in the RK territory;
- local legal entity where a foreign investor owns $\geq 50\%$ of voting shares or participation interests in the charter capital;
- investors in case of presence of a concluded investment contract with the state.

⁹ An investment dispute means a dispute arising from contractual obligations between investors and governmental agencies in connection with the investor's investment activities.

Investment disputes involving a large investor¹⁰ and subjected to the rules of the first instance court are reviewed by a specialized judicial board of the RK Supreme Court.

To optimize and simplify the process of administration of justice, courts broadly use information technologies. A statement of claim, response, application, specific and appellate complaints and other procedural documents may be submitted in the electronic form using the "[Judicial Cabinet](#)" service. This service allows to keep track of the case progress and review judicial acts.

Courts perform audio and video recording of court sessions and use technical communication means allowing for remote participation in court sessions. This facilitates the participation in a judicial process of persons living or staying outside the location of court. During the quarantine measures, all courts conducted online sessions.

■ **First Instance Court Proceedings**

The timeframes for civil cases review vary depending on the case category and complexity and are 2-3 months on average.

When filing a claim in court, the state fee is payable in the following amounts:

- for property claims, on individuals – 1%, on legal entities – 3% of the stated claim amount;
- for non-property claims – 0.5 MCI.

As a general rule, a claim is filed with the court at the respondent's location; however, in certain cases the territorial jurisdiction may be different (at the place of contract performance, at the branch/representative office location, etc.).

In cases stipulated by law or contract, submission to court must be preceded by pre-judicial dispute settlement. Pursuant to the law, such settlement is mandatory for most labor disputes, disputes concerning contract amendment or termination, disputes with shippers, disputes with customs authorities, and some other categories of disputes.

The parties may enter into an amicable agreement or agreement to settle the dispute via mediation or participatory procedure. The parties to the dispute may take advantage of this right in the courts of the first, appellate and cassation instances before withdrawal of judges to the conference room, and at the stage of judgment enforcement.

Certain categories of cases may be reviewed in writ or simplified proceedings. Particularly, the writ proceedings apply to claims for the performance of mediation agreements and pre-trial settlement agreements with respect to many categories of disputes, including claims for recovery of debts for taxes and customs payments from individuals. The simplified proceedings apply to cases over claims for money recovery, if the claim value does not exceed 2,000 MCI for legal entities or 1,000 MCI for individual entrepreneurs and

¹⁰ A large investor means an individual or a legal entity making investments in Kazakhstan in the amount of at least 2,000,000 MCI.

individuals. Cases subjected to writ or simplified proceedings are reviewed without summoning the parties, based on the written documents provided by them.

The first instance court's judgments enter into force upon expiration of the period for their appeal, unless they have been appealed (protested).

■ Revision of Judicial Acts

The acts of first instance courts may be revised in accordance with **appellate or cassation** procedure, except for some categories of cases. The act revision proceedings may be initiated by the parties to dispute, persons involved in the case, other persons whose interests are affected by the court acts, or by the prosecutor.

When filing an appellate petition no state duty is payable. Motions to dispute judicial acts in a cassation procedure require payment of a state duty in the amount of 50% of the relevant state duty rate specified above in clause 19.1.2.

■ Appellate Proceedings

The first instance court's judgments, which have not entered into legal force, may be appealed via appellate procedure within 1 month of the final judgment issuance date. For persons not participating in the proceedings this period is calculated from the date of sending them a copy of the judgment.

Appellate claims are reviewed by judicial panel comprising at least three judges. The general case review period in appellate instance is 2 months of the date the case is received by the court.

The appellate instance court verifies the lawfulness and justifiability of the first instance court's judgment in full according to the case-available evidence. New evidence may be accepted only if the appellate instance court acknowledges that impossibility of their submission to the first instance court was due to valid reasons.

Some rulings of the first instance court, which do adjudge the case on the merits, may be contested by specific appeal or protest within 10 business days of the final ruling preparation date. The specific appeal is reviewed by an appellate court judge sitting alone.

The appellate instance court's judgments enter into force from the moment they are announced.

■ Cassation Proceedings

Judicial acts of the appellate instance courts may be appealed by way of cassation within 6 months of the date of their entry into force.

Some judicial acts are not subject to revision by way of cassation, in particular:

- acts on cases reviewed in simplified proceedings;
- acts on cases ended by amicable agreement or agreement to settle the dispute through mediation; or

- where the claim amount is less than 2,000 MCI for individuals or less than 30,000 MCI for legal entities.

A motion or a protest for revision of judicial acts by cassation is preliminarily considered by a single judge. The preliminary motion review period is 30 business days of the date the motion is received by the court. In the event of certiorari, such period is calculated from the date the case is received by the cassation instance court.

If a case is referred for revision by a cassation board following the results of preliminary review of a motion, such board composed of at least three judges considers the motion within 30 business days of the date of its receipt by the board.

The rulings of the court of cassation instance enter into force from the day they are announced.

Judicial acts not appealed via appellate procedure are not subject to revision by cassation, except where cassation proceedings are instituted upon submission by the Chairman of the RK Supreme Court or upon a protest brought by the RK Prosecutor General.

■ **Case revision upon newly discovered or new circumstances.** Judicial acts which entered into legal force may be revised upon newly discovered or new circumstances, which include, for example:

- cancellation of a judicial act, which had prejudicial value when reviewing the case; or
- an effective judgment to invalidate the transaction on the basis of which the judicial act was issued; or
- revocation of an arbitral award, with respect to enforcement of which there has been issued a judicial act.

The case is to be revised upon newly discovered circumstances by the same court whose judicial act is being revised.

■ **Proceedings in Cases with Foreign Persons Participation**

Kazakh courts hear cases involving foreign persons, if, among other things:

- the defendant legal entity is located or has property in the territory of Kazakhstan;
- the individual defendant resides or has property in Kazakhstan;
- the management body or the branch/representative office of the foreign legal entity is located in Kazakhstan;
- in cases for compensation of harm caused to property, an action or other circumstance giving rise to the harm compensation claim took place in the RK territory;
- the lawsuit stems from a contract, which was to be or was performed, in full or in part, in the RK territory;

- the lawsuit stems from an unjust enrichment occurring in Kazakhstan.

Local courts of law have exclusive jurisdiction over certain categories of cases. For instance, only Kazakh courts may review cases relating to the rights to immovable property located in Kazakhstan; cases upon claims against shippers stemming from shipping contracts, if the shipper is located in the RK, etc.

19.2. DISPUTE SETTLEMENT BY ARBITRATION

The key provisions governing arbitration proceedings are defined by the RK [Law](#) No. 488-V "On Arbitration" dated 8 April 2016. The arbitration rules are defined by the rules of permanent arbitrations.

A dispute may be referred to arbitration if there is an arbitration agreement between the parties. Certain categories of disputes cannot be referred to arbitration, specifically, rehabilitation and bankruptcy disputes, or disputes between natural monopoly entities and their consumers, etc.

There are certain restrictions on disputes a party to which are governmental agencies or enterprises, or legal entities in which the state directly or indirectly holds 50 or more percent of the voting shares or participation interests in the authorized capital. Disputes between such legal entities representing a party to a dispute and Kazakhstan individuals and/or legal entities representing another party to such dispute may be referred to arbitration only subject to the authorized agency's consent.

19.3. RECOGNITION AND ENFORCEMENT OF FOREIGN JUDGMENTS AND ARBITRAL AWARDS

Foreign judgments and arbitral awards are recognized and enforced in Kazakhstan, if this is provided for by a law and/or an international treaty ratified by the RK, or on the basis of reciprocity.

Kazakhstan has acceded to the following international conventions:

- [Convention](#) on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 10 June 1958); and
- European [Convention](#) on International Commercial Arbitration (Geneva, 21 April 1961).

The list of grounds for a refusal to recognize and enforce foreign arbitral awards stipulated by the RK Civil Procedure Code generally coincides with the list of grounds under the New York Convention, except for the following. The RK Civil Procedural Code provides for one additional ground, pursuant to which it is possible to refuse to recognize and enforce a foreign arbitral award, if there is a legally effective court judgment or arbitral award issued in Kazakhstan in respect of a dispute between the same parties, concerning the same subject and for the same grounds, or there is a ruling issued by court or arbitral tribunal on termination of proceedings in a case in connection with claim withdrawal by a claimant.

Kazakhstan is also a party to a number of multilateral international treaties providing for the mutual recognition and enforcement of judgments of the states located in the former USSR territory: Russia, Belarus, Ukraine, Moldova, Kyrgyzstan, Uzbekistan, Turkmenistan, Tajikistan, Georgia, Armenia, Azerbaijan and Lithuania.

Kazakhstan has also entered into bilateral international treaties on mutual legal assistance, including recognition and enforcement of judgments, with a number of other countries, in particular with Pakistan, India, Lithuania, Democratic People's Republic of Korea, Turkey, Mongolia, China, UAE and Vietnam.

A foreign judgment or arbitral award may be filed for enforcement within 3 years from the date its voluntary execution period has expired. As a rule, an application for recognition and enforcement of a foreign judgment or arbitral award is filed to court at the place of location of the debtor or its property. Such application is reviewed by a sole judge within 15 business days of the date the application is received by court. The period missed for a valid reason may be reinstated.

19.4. COURT AND ARBITRATION OF THE ASTANA INTERNATIONAL FINANCIAL CENTER

Starting 1 January 2017, the [Constitutional Law](#) No. 438-V "On the Astana International Financial Center (**AIFC**)" dated 7 December 2015, which is the territory with a special legal regime in the financial sphere, entered into force in Kazakhstan. The AIFC has its own Court, which is beyond the RK judicial system and resolves disputes according to the current procedural AIFC law. The AIFC law comprises, among other things, the AIFC acts based on the principles, norms and precedents of England and Wales and/or standards of the leading international financial centers, unless such acts contradict the above Constitutional Law.

The [AIFC court](#) considers and resolves the disputes, which:

- arise between the AIFC participants, the AIFC bodies and/or their foreign employees;
- relate to any operation conducted in the AIFC and governed by the AIFC law; and
- were referred to the AIFC Court by agreement of the parties.

The AIFC Court is composed of 9 justices headed by the Rt. Hon. the [Lord Mance](#), one of the top justices in the contemporary history of English law. The judicial proceedings in the AIFC Court are conducted in English.

The AIFC judgments are enforced in Kazakhstan in the same manner and on the same conditions as the judgments of the RK courts, and no recognition of such judgments by a Kazakhstan court is required. If so requested by the party concerned, the AIFC court may issue an execution order for its judgment enforcement. In addition to the AIFC court's judgments, AIFC Court's orders on claim security and cancellation of claim security measures may also be enforced in Kazakhstan.

The International Arbitration Center (IAC) was also established under the AIFC, which considers disputes provided there is a respective arbitration agreement between the parties. 41 independent international arbitrators from all over the world participate in the IAC's work. The IAC's award issued in the AIFC is enforced in the AIFC territory based on a respective AIFC court's order, i.e. to enforce an arbitral award in the AIFC territory it is necessary to apply to the AIFC court. The awards of the IAC are recognized and enforced in Kazakhstan according to the same procedure as established for the recognition and enforcement of arbitral awards issued by the RK arbitration tribunals. This means that in order to achieve recognition and enforcement of the IAC's award in the Kazakhstan territory it is necessary to apply to a Kazakhstan court. According to such application, a Kazakhstan court conducts judicial proceedings and issues a ruling on enforcement of the arbitral award, and later issues a writ of execution (enforcement order) with respect to such ruling.

In 2019, the AIFC launched the eJustice electronic system allowing the parties to file claims and other procedural documents in the electronic form and gain access to online dispute resolution services using the cutting edge digital technologies. AEQUITAS lawyers underwent in-depth study of the eJustice system and they are ready to represent clients in the AIFC Court and the IAC.

Before 31 December 2021, the AIFC court did not charge for filing claims, administration and conduct of hearings. Furthermore, parties to a contract signed before 31 December 2021, which contains a clause on the jurisdiction of the AIFC court over disputes, will be entitled to free-of-charge administration and resolution of disputes arising out of such contract in the AIFC court even after 31 December 2021.

The IAC also cancelled its fee for registration, administration and conduct of hearings until 31 December 2021. Furthermore, exemption from the necessity to pay the administration fee is granted for the contracts signed before 31 December 2021, which contain the AIC's arbitration clause. For these contracts, fee for administration of an arbitration hearing will not be charged both before and after 31 December 2021.

Presence of benefits with respect to judicial and arbitration fees, conduct of court and arbitration hearings in English under own procedural rules based on the rules and principles of laws of England and Wales make the AIFC court and IAC an attractive platform for resolution of disputes involving foreign companies.

For more details about the AIFC court, IAC and its other advantages, please see AEQUITAS review.

PLANNING TO OPEN BUSINESS IN KAZAKHSTAN? AEQUITAS WILL BE HAPPY TO HELP

AEQUITAS has been providing services to support the establishment of businesses in Kazakhstan since the time of adoption of its first legislative acts on commercial legal entities, the firm's lawyers thus being versed in all statutory and current practice subtleties. The firm provided legal support to launch the first joint ventures, representative offices of foreign banks and subsidiaries of major industrial and energy corporations in Kazakhstan.

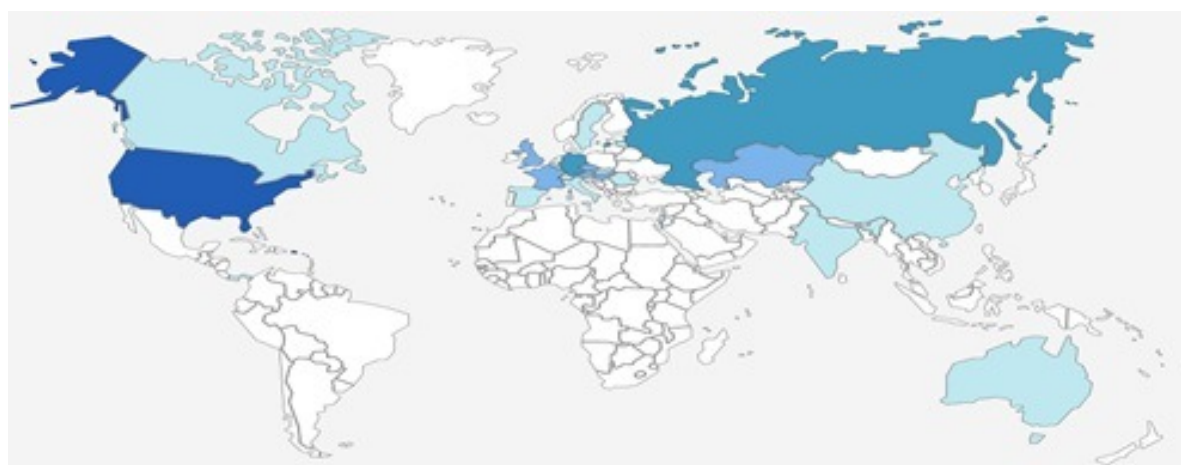

When rendering legal support to set up and register legal entities, branches and representative offices, AEQUITAS provides "turnkey" services, from the drafting of foundation documents to opening of bank accounts and obtainment of corporate seal. The client does not have to be present in Kazakhstan until it comes to the state registration of its legal entity or structural subdivision.

AEQUITAS lawyers help the clients register businesses not only in Almaty and Nur-Sultan where the firm's offices are located, but in the entire territory of Kazakhstan.

"Operative and exhaustive responses to the client's queries, ability to work within the hard timelines and under pressure, detailed elaboration of a subject matter."

The Legal 500 2021

"Deep knowledge of the underlying matters, strong analysis skills."

Asialaw Profiles 2022

"Their advice is academically fundamental and thorough, but at the same time addresses practical aspects, solutions and recommendations."

Chambers Asia Pacific 2021

AEQUITAS, a Kazakhstan national law firm, was founded in 1993.

In the early 90s, AEQUITAS was one of the first counsels to provide legal support both to foreign investors coming to Kazakhstan's market and to the starting domestic businesses.

First joint ventures with foreign participation in Kazakhstan were organized with AEQUITAS legal support.

AEQUITAS is one of Kazakhstan's leading law firms acknowledged in the global legal services market. For many years, authoritative legal guides, including [Chambers & Partners](#), [Who's Who Legal](#), [The Legal 500](#), Best Lawyers, [Asia Law Profiles](#) are rating AEQUITAS and its partners and associates as the **country's most recommended** in the Energy & Natural Resources, Corporate & Finance, M&A, Dispute Resolution and other areas. Many publications specifically acclaim the firm's Labor, Environmental and Healthcare & Pharmaceuticals practice.

The Who's Who Legal agency recognized AEQUITAS as the "**Firm of the Year**" in **Kazakhstan** within the [WWL Awards 2021](#).

AEQUITAS's clients are companies active in the leading sectors of economy from **more than 50 countries**, including major international corporations, companies representing world famous brands, banks and financial institutions, most of them working with AEQUITAS for years. According to the rating agencies and the firm's clients and business partners, AEQUITAS is **one of the most client-oriented law firms in Kazakhstan**. Alongside with providing legal services of invariably high quality, AEQUITAS is regularly informing its clients of the business-relevant changes in legislation and practice, organizing trainings and seminars and annually holding a Client Day.

AEQUITAS reputation is supported by close professional ties with the world's largest international and national law firms, such as Allen & Overy, Baker Botts, Clifford Chance, Debevoise & Plimpton, Freshfields Bruckhaus Deringer, ALRUD, Egorov Puginsky Afanasiev & Partners, Pepeliaev Group, and others. The firm's lawyers are well informed about the legal service markets of Russia, UK, USA and CIS countries. Thanks to

cooperation with its international and national partners, AEQUITAS is **prepared to provide services in different jurisdictions, without compromising on their quality and timeliness.**

The firm's long presence in the legal market, reputation and extensive professional ties allow AEQUITAS engaging the **leading Kazakh and foreign experts in all areas of law** to participate in its projects and preparation of legal opinions. AEQUITAS's consultants are renowned scholars, specialists from different sectors of economy and representatives of international organizations.

AEQUITAS team of lawyers is **a team of professionals** perfectly versed in the Kazakh legislation and specifics of the national market. The firm's partners and associates are recognized experts both in Kazakhstan and abroad.

AEQUITAS and its lawyers are members in different professional organizations and unions, including International Bar Association (IBA), Association of International Petroleum Negotiators (AIPN), Kazakhstan Petroleum Lawyers' Association (KPLA) and Kazakhstan Bar Association (KazBar). In 2015, AEQUITAS was affiliated by Ius Laboris, the largest Alliance of leading employment, labor and pension law firms. In 2021, the firm became the exclusive representative of Kazakhstan in TerraLex, international network of law firms.

AEQUITAS partners are among the members of Kazakhstan Bar Association set up on the initiative of the leading Kazakh law firms, including AEQUITAS. Olga Chentsova, the firm's Managing Partner, is one of the founders of Kazakhstan Bar Association and a member of its Management Board.

AEQUITAS partners and associates are **on the lists of arbitrators for the following courts of arbitration and domestic arbitration tribunals:** Center for Arbitration and Domestic Arbitration Tribunal Proceedings under the National Chamber of Entrepreneurs of the Republic of Kazakhstan, Kazakhstan International Arbitrage (KIA), International Arbitration Court of the Republic of Kazakhstan (IAC), International Court of Arbitration of IUS Legal Center, International Commercial Arbitration Court of Eurasian Mediation Center, Caspian Arbitration Society and Arbitration Tribunal of Eurasian Mediation Center. AEQUITAS lawyers act as local law experts in disputes reviewed by the leading international courts of arbitration.

AEQUITAS is widely known for its **research and analytical work.** The firm is annually engaged to prepare reviews on different local law areas for IBA and World Bank. Analytical articles and reviews on different aspects of the Kazakh law and legislation by AEQUITAS lawyers are published in specialized magazines and analytical-and-legal compendia in Kazakhstan and abroad.

AEQUITAS experts have been actively participating in the development and improvement of the most important acts of Kazakhstan's civil and economic legislation, including the Civil Code and such laws of key importance to the country's economy as the Foreign Investment

Law, Petroleum Law, Subsoil Law, Law on International Commercial Arbitration and a number of other regulatory legal acts.

The firm's potential allows providing **services to embrace practically all issues** its clients may have arising, be it legal support in complex projects, advice on various civil law matters, establishment of new companies, or representation in courts at any level.

The firm has offices in Almaty and Nur-Sultan (Kazakhstan). In 2019, AEQUITAS obtained a license of 14 June 2019 modified as of 13 January 2022, allowing to provide consulting services (compliance, regulatory, due diligence, risk consultancy) and act as a Company Service Provider.
